-------
******* Extraordinary Cash Dividends - Note that neither the symbol nor the clearing code changes.
       0
      55 Extraordinary cash dividends are dividends outside of the routine practice of periodic dividend payments and will be handled by reducing the
         start-of-day price by the amount of the extraordinary cash dividend.
      55
      55 In this example, with the MRK1C future settled at 50.60 USD per share on the previous day, and for which the underlying stock had a 1.00 USD per
         share extraordinary cash dividend:
      55 • The adjusted start-of-day futures price is reduced by subtracting 1.00 from 50.60, yielding 49.60.
-------• The future settled this day at 52.91, there is a settlement variation of 11,585.00 USD based on the start-of-day position.
      55
      55 The trade register notes the Extraordinary cash dividend as a memo item. The total of  3,500 USD is not included as part of the settlement figure.
