

# Dreyfus Institutional Cash Advantage Fund

**Prospectus**  
September 1, 2013

**Institutional Advantage  
Shares**

Ticker Symbol: DADXX

**DREYFUS INSTITUTIONAL CASH ADVANTAGE FUNDS  
- Dreyfus Institutional Cash Advantage Fund**

**Supplement to Prospectuses  
dated September 1, 2013**

*The following changes will take effect as of January 13, 2014*

**The following replaces the second sentence in “Fund Summary - Principal Investment Strategy” in the prospectuses:**

To pursue its goal, the fund normally invests in a diversified portfolio of high quality, short-term, dollar-denominated debt securities, including: securities issued or guaranteed as to principal and interest by the U.S. government or its agencies or instrumentalities; certificates of deposit, time deposits, bankers’ acceptances and other short-term securities issued by domestic or foreign banks or thrifts or their subsidiaries or branches; repurchase agreements, including tri-party repurchase agreements; asset-backed securities; municipal securities; domestic and foreign commercial paper and other short-term corporate obligations, including those with floating or variable rates of interest; and dollar-denominated obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions or agencies.

**The following replaces the third sentence in “Fund Details - Goal and Approach” in the prospectuses:**

To pursue its goal, the fund normally invests in a diversified portfolio of high quality, short-term, dollar-denominated debt securities, including:

- securities issued or guaranteed as to principal and interest by the U.S. government or its agencies or instrumentalities
- certificates of deposit, time deposits, bankers' acceptances and other short-term securities issued by domestic or foreign banks or thrifts or their subsidiaries or branches
- repurchase agreements, including tri-party repurchase agreements
- asset-backed securities
- municipal securities
- domestic and foreign commercial paper, and other short-term corporate obligations, including those with floating or variable rates of interest
- dollar-denominated obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions or agencies

**The following information supplements “Fund Summary – Principal Risks” and “Fund Details – Investment Risks” in the prospectuses:**

- *Municipal securities risk.* The amount of public information available about municipal securities is generally less than that for corporate equities or bonds. Special factors, such as legislative changes, and state and local economic and business developments, may adversely affect the yield and/or value of the fund’s investments in municipal securities. Other factors include the general conditions of the municipal securities market, the size of the particular offering, the maturity of the obligation and the rating of the issue.

# Fund Summary

## Investment Objective

The fund seeks as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity.

## Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the fund.

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management fees	0.15
Other expenses	0.01
Total annual fund operating expenses	0.16

## Example

The Example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
\$16	\$52	\$90	\$205

## Principal Investment Strategy

As a money market fund, the fund is subject to the maturity, quality, liquidity and diversification requirements of Rule 2a-7 under the Investment Company Act of 1940, as amended, which are designed to help money market funds maintain a stable share price of \$1.00. To pursue its goal, the fund normally invests in a diversified portfolio of high quality, short-term, dollar-denominated debt securities, including: securities issued or guaranteed as to principal and interest by the U.S. government or its agencies or instrumentalities; certificates of deposit, time deposits, bankers' acceptances and other short-term securities issued by domestic or foreign banks or thrifts or their subsidiaries or branches; repurchase agreements, including tri-party repurchase agreements; asset-backed securities; domestic and dollar-denominated foreign commercial paper, and other short-term corporate obligations, including those with floating or variable rates of interest; and dollar-denominated obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions or agencies. Normally, the fund invests at least 25% of its assets in domestic or dollar-denominated foreign bank obligations.

## Principal Risks

An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

The fund's yield will fluctuate as the short-term securities in its portfolio mature and the proceeds are reinvested in securities with different interest rates. Additionally, while the fund has maintained a constant share price since inception, and will continue to try to do so, neither The Dreyfus Corporation nor its affiliates are required to make a capital infusion, enter into a capital support agreement or take other actions to prevent the fund's share price from falling below \$1.00. The following are the principal risks that could reduce the fund's income level and/or share price:

- *Interest rate risk.* This risk refers to the decline in the prices of fixed-income securities that may accompany a rise in the overall level of interest rates. A sharp and unexpected rise in interest rates could cause a money market fund's share price to drop below a dollar.

- **Credit risk.** Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a security, can cause the security's price to fall, potentially lowering the fund's share price. Although the fund invests only in high quality debt securities, any of the fund's holdings could have its credit rating downgraded or could default. The credit quality of the securities held by the fund can change rapidly in certain market environments, and the default of a single holding could have the potential to cause significant deterioration of the fund's net asset value.
- **Liquidity risk.** When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities may fall dramatically, potentially lowering the fund's share price, even during periods of declining interest rates. Also, during such periods, redemptions by a few large investors in the fund may have a significant adverse effect on the fund's net asset value and remaining fund shareholders.
- **Banking industry risk.** The risks generally associated with concentrating investments in the banking industry, such as interest rate risk, credit risk, and regulatory developments relating to the banking industry.
- **Foreign investment risk.** The risks generally associated with dollar-denominated foreign investments, such as economic and political developments, seizure or nationalization of deposits, imposition of taxes or other restrictions on payment of principal and interest.
- **Government securities risk.** Not all obligations of the U.S. government, its agencies and instrumentalities are backed by the full faith and credit of the U.S. Treasury. Some obligations are backed only by the credit of the issuing agency or instrumentality, and in some cases there may be some risk of default by the issuer. Any guarantee by the U.S. government or its agencies or instrumentalities of a security held by the fund does not apply to the market value of such security or to shares of the fund itself. A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only as to the timely payment of interest and principal when held to maturity. In addition, because many types of U.S. government securities trade actively outside the United States, their prices may rise and fall as changes in global economic conditions affect the demand for these securities.
- **Repurchase agreement counterparty risk.** The risk that a counterparty in a repurchase agreement could fail to honor the terms of its agreement.

## Performance

The following bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the performance of the fund's Institutional Advantage shares from year to year. The table shows the average annual total returns of the fund's Institutional Advantage shares over time. The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future. More recent performance information may be available at [www.dreyfus.com](http://www.dreyfus.com).

The fund's year-to-date total return as of June 30, 2013 was 0.04% for Institutional Advantage shares.

Average Annual Total Returns (as of 12/31/12)		
1 Year	5 Years	10 Years
0.14%	0.79%	1.97%

Institutions may call toll-free 1-800-346-3621 for the current yield of the fund's Institutional Advantage shares. Individuals or entities for whom institutions may purchase or redeem shares should call the institution directly.

## Portfolio Management

The fund's investment adviser is The Dreyfus Corporation.

## **Purchase and Sale of Fund Shares**

---

The fund is designed for institutional investors. In general, the fund's minimum initial investment is \$250,000,000, with no minimum subsequent investment. Certain types of accounts are eligible for lower minimum investments. You may sell (redeem) your shares on any business day by wire, telephone or compatible computer facility.

## **Tax Information**

---

Dividends and other distributions paid by the fund are subject to federal income tax, and may be subject to state and local taxes, in the calendar year earned, except when your investment is through a tax-advantaged retirement account (in which case you may be taxed upon withdrawal of your investment from such account).

## **Payments to Broker-Dealers and Other Financial Intermediaries**

---

If you purchase shares through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

# Fund Details

## Goal and Approach

---

The fund seeks as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity. As a money market fund, the fund is subject to the maturity, quality, liquidity and diversification requirements of Rule 2a-7 under the Investment Company Act of 1940, as amended, which are designed to help money market funds maintain a stable share price of \$1.00.

To pursue its goal, the fund normally invests in a diversified portfolio of high quality, short-term, dollar-denominated debt securities, including:

- securities issued or guaranteed as to principal and interest by the U.S. government or its agencies or instrumentalities
- certificates of deposit, time deposits, bankers' acceptances and other short-term securities issued by domestic or foreign banks or thrifts or their subsidiaries or branches
- repurchase agreements, including tri-party repurchase agreements
- asset-backed securities
- domestic and dollar-denominated foreign commercial paper, and other short-term corporate obligations, including those with floating or variable rates of interest
- dollar-denominated obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions or agencies

Normally, the fund invests at least 25% of its assets in domestic or dollar-denominated foreign bank obligations.

The fund is required to hold at least 30% of its assets in cash, U.S. Treasury securities, certain other government securities with remaining maturities of 60 days or less, or securities that can readily be converted into cash within five business days. In addition, the fund is required to hold at least 10% of its assets in cash, U.S. Treasury securities, or securities that can readily be converted into cash within one business day. The maximum weighted average maturity of the fund's portfolio is 60 days and the maximum weighted average life to maturity of the fund's portfolio is 120 days. The fund purchases securities with the highest credit rating only, or the unrated equivalent as determined by The Dreyfus Corporation.

In response to liquidity needs or unusual market conditions, the fund may hold all or a significant portion of its total assets in cash for temporary defensive purposes. This may result in a lower current yield and prevent the fund from achieving its investment objective.

## Investment Risks

---

An investment in the fund is not insured or guaranteed by the FDIC or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

The fund's yield will fluctuate as the short-term securities in its portfolio mature and the proceeds are reinvested in securities with different interest rates. Additionally, while the fund has maintained a constant share price since inception, and will continue to try to do so, neither The Dreyfus Corporation nor its affiliates are required to make a capital infusion, enter into a capital support agreement or take other actions to prevent the fund's share price from falling below \$1.00. The following are the principal risks that could reduce the fund's income level and/or share price:

- *Interest rate risk.* This risk refers to the decline in the prices of fixed-income securities that may accompany a rise in the overall level of interest rates. The fund's yield will vary; it is not fixed for a specific period like the yield on a bank certificate of deposit. A sharp and unexpected rise in interest rates could cause a money market fund's share price to drop below a dollar. However, the extremely short maturities of the securities held in money market portfolios - a means of achieving an overall fund objective of principal safety - reduces their potential for price fluctuation. A low interest rate environment may prevent the fund from providing a positive yield or paying fund expenses out of fund assets and could impair the fund's ability to maintain a stable net asset value.

- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a security, can cause the security's price to fall, potentially lowering the fund's share price. Although the fund invests only in high quality debt securities, any of the fund's holdings could have its credit rating downgraded or could default. The credit quality of the securities held by the fund can change rapidly in certain market environments, and the default of a single holding could have the potential to cause significant deterioration of the fund's net asset value.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities may fall dramatically, potentially lowering the fund's share price, even during periods of declining interest rates. Also, during such periods, redemptions by a few large investors in the fund may have a significant adverse effect on the fund's net asset value and remaining fund shareholders.
- *Banking industry risk.* The risks generally associated with concentrating investments in the banking industry, such as interest rate risk, credit risk, and regulatory developments relating to the banking industry.
- *Foreign investment risk.* The risks generally associated with dollar-denominated foreign investments, such as economic and political developments, seizure or nationalization of deposits, imposition of taxes or other restrictions on payment of principal and interest.
- *Government securities risk.* Not all obligations of the U.S. government, its agencies and instrumentalities are backed by the full faith and credit of the U.S. Treasury. Some obligations are backed only by the credit of the issuing agency or instrumentality, and in some cases there may be some risk of default by the issuer. Any guarantee by the U.S. government or its agencies or instrumentalities of a security held by the fund does not apply to the market value of such security or to shares of the fund itself. A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only as to the timely payment of interest and principal when held to maturity. In addition, because many types of U.S. government securities trade actively outside the United States, their prices may rise and fall as changes in global economic conditions affect the demand for these securities.
- *Repurchase agreement counterparty risk.* The risk that a counterparty in a repurchase agreement could fail to honor the terms of its agreement.

## Management

---

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$244 billion in 166 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of .15% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's semiannual report for the six-month period ended October 31, 2012. Dreyfus is the primary mutual fund business of The Bank of New York Mellon Corporation (BNY Mellon), a global financial services company focused on helping clients manage and service their financial assets, operating in 35 countries and serving more than 100 markets. BNY Mellon is a leading investment management and investment services company, uniquely focused to help clients manage and move their financial assets in the rapidly changing global marketplace. BNY Mellon has \$26.2 trillion in assets under custody and administration and \$1.4 trillion in assets under management. BNY Mellon is the corporate brand of The Bank of New York Mellon Corporation. BNY Mellon Investment Management is one of the world's leading investment management organizations, and one of the top U.S. wealth managers, encompassing BNY Mellon's affiliated investment management firms, wealth management services and global distribution companies. Additional information is available at [www.bnymellon.com](http://www.bnymellon.com).

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

MBSC Securities Corporation (MBSC), a wholly owned subsidiary of Dreyfus, serves as distributor of the fund and of the other funds in the Dreyfus Family of Funds. Any Rule 12b-1 fees and shareholder services fees, as applicable, are paid to MBSC for financing the sale and distribution of fund shares and for providing shareholder account service and maintenance, respectively. Dreyfus or MBSC may provide cash payments out of its own resources to financial intermediaries that sell shares of funds in the Dreyfus Family of Funds or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses that may be paid by a fund to those intermediaries. Because those payments are not made by fund shareholders or the fund, the fund's total expense ratio will not be affected by any such payments. These payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial

intermediary. Cash compensation also may be paid from Dreyfus' or MBSC's own resources to intermediaries for inclusion of a fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or MBSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorships; support for recognition programs; technology or infrastructure support; and other forms of cash or non-cash compensation permissible under broker-dealer regulations. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

The fund, Dreyfus and MBSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each code of ethics restricts the personal securities transactions of employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the respective codes is to ensure that personal trading by employees does not disadvantage any fund managed by Dreyfus or its affiliates.

# Shareholder Guide

## Buying and Selling Shares

---

The fund is designed for institutional investors, acting for themselves or in a fiduciary, advisory, agency, brokerage, custodial or similar capacity. The fund shares may not be purchased directly by individuals, although institutions may purchase shares for accounts maintained by individuals. Generally, each investor will be required to open a single master account with the fund for all purposes. In certain cases, the fund may request investors to maintain separate master accounts for shares held by the investor (i) for its own account, for the account of other institutions and for accounts for which the institution acts as a fiduciary, and (ii) for accounts for which the investor acts in some other capacity. An institution may arrange with the fund's transfer agent for sub-accounting services and will be charged directly for the cost of such services. Institutions purchasing Institutional Advantage shares for the benefit of their clients may impose policies, limitations and fees which are different from those described in this prospectus. The fund offers other classes of shares, which are described in separate prospectuses. Institutions purchasing fund shares on behalf of their clients determine which class is suitable for their clients.

Your price for shares is the net asset value per share (NAV).

The fund's portfolio securities are valued at amortized cost, which does not take into account unrealized gains or losses. As a result, portfolio securities are valued at their acquisition cost, adjusted over time based on the discounts or premiums reflected in their purchase price. The fund uses the amortized cost method of valuation pursuant to Rule 2a-7 under the Investment Company Act of 1940, as amended, in order to be able to price its shares at \$1.00 per share. In accordance with Rule 2a-7, the fund is subject to certain maturity, quality, liquidity and diversification requirements to help it maintain the \$1.00 per share price.

When calculating its NAV, the fund compares the NAV using amortized cost to its NAV using available market quotations or market equivalents, which generally are provided by an independent pricing service approved by the fund's board. The pricing service's procedures are reviewed under the general supervision of the board.

## How to Buy Shares

You pay no sales charge to invest in shares of the fund. The NAV is generally calculated at 5:00 p.m. on days the New York Stock Exchange or the transfer agent is open for regular business.

Investors whose orders in proper form are received by 5:00 p.m., and payments for which are received in or converted into Federal Funds by the fund's custodian by 6:00 p.m., will be effective at the NAV determined at 5:00 p.m. on that day. In this case, shares purchased will receive the dividend declared on that day.

An order in proper form received after the time of day at which the fund determines its NAV will be effective on the following business day, provided the fund's custodian receives Federal Funds by 6:00 p.m.

All times are Eastern time.

**By Wire.** To open an account by wire, or purchase additional shares, please contact a Dreyfus Investments Division representative by calling 1-800-346-3621 for more information.

**By Computer.** You may input new account data and retrieve an account number for your records by accessing The Dreyfus Lion Remote System. Be sure to print a report of transactions for your records. Please contact the Dreyfus Investments Division by calling 1-800-346-3621 for more information about The Dreyfus Lion Remote System or any other compatible computerized trading system.

The minimum initial investment in Institutional Advantage shares is \$250,000,000, with no minimum subsequent investment, unless: (a) the investor has invested at least \$250,000,000 in the aggregate among the fund and any Dreyfus Cash Management Fund (listed under "Services For Fund Investors – Fund Exchanges"); or (b) the investor has, in the opinion of Dreyfus Investments Division, adequate intent and availability of assets to reach a future level of investment of \$250,000,000 among such funds.

## How to Sell Shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Your order will be processed promptly and you will generally receive the proceeds of a redemption within a week.

If a redemption request is received in proper form by the fund's transfer agent or other authorized entity by 5:00 p.m., the proceeds of the redemption, if transfer by wire is requested, ordinarily will be transmitted in Federal Funds on the same day, and the shares will not receive the dividend declared on that day.

All times are Eastern time.

The processing of redemptions and the delivery of the proceeds may be delayed beyond the same or next business day, depending on the circumstances, for any period: (i) during which the New York Stock Exchange is closed (other than on holidays or weekends), or during which trading on the New York Stock Exchange is restricted; (ii) when an emergency exists that makes difficult the disposal of securities owned by the fund or the determination of the fair value of the fund's net assets; or (iii) as permitted by order of the Securities and Exchange Commission for the protection of fund shareholders. If, for one of these reasons, the processing of redemptions and the delivery of redemption proceeds is delayed beyond the same or next business day, the delay may be for up to seven days. For these purposes, the Securities and Exchange Commission determines the conditions under which trading shall be deemed to be restricted and an emergency shall be deemed to exist. Any certificates representing fund shares being sold must be returned with the redemption request.

Before selling recently purchased shares, please note that the fund may delay selling the shares for up to eight business days following the purchase of those shares.

**By Wire.** To redeem shares, please contact a Dreyfus Investments Division representative by calling 1-800-346-3621 with information about your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**By Computer.** You may redeem shares by accessing The Dreyfus Lion Remote System to confirm bank account information or select from multiple wire instructions. Be sure to print a report of transactions for your records.

## General Policies

---

The fund and the fund's transfer agent are authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the fund or the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund or the transfer agent (as applicable) takes reasonable measures to confirm that the instructions are genuine.

Money market funds generally are used by investors for short-term investments, often in place of bank checking or savings accounts, or for cash management purposes. Investors value the ability to add and withdraw their funds quickly, without restriction. For this reason, although Dreyfus discourages excessive trading and other abusive trading practices, the fund has not adopted policies and procedures, or imposed redemption fees or other restrictions such as minimum holding periods, to deter frequent purchases and redemptions of fund shares. Dreyfus also believes that money market funds, such as the fund, are not targets of abusive trading practices, because money market funds seek to maintain a \$1.00 per share price and typically do not fluctuate in value based on market prices. However, frequent purchases and redemptions of the fund's shares could increase the fund's transaction costs, such as market spreads and custodial fees, and may interfere with the efficient management of the fund's portfolio, which could detract from the fund's performance. Accordingly, the fund reserves the right to refuse any purchase or exchange request. Funds in the Dreyfus Family of Funds that are not money market mutual funds have approved policies and procedures that are intended to discourage and prevent abusive trading practices in those mutual funds, which may apply to exchanges from or into a fund. If you plan to exchange your fund shares for shares of another Dreyfus fund, please read the prospectus of that other Dreyfus fund for more information.

The fund also reserves the right to:

- change or discontinue fund exchanges, or temporarily suspend exchanges during unusual market conditions
- change its minimum investment amounts
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets). Investors are urged to call Dreyfus Investments Division before effecting any large transactions.

The fund also may process purchase and sale orders and calculate its NAV on days the fund's primary trading markets are open and the fund's management determines to do so.

## **Distributions and Taxes**

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends once a month and capital gain distributions, if any, annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Dividends and other distributions paid by the fund are subject to federal income tax on a current basis, and also may be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account, in which case taxes may be deferred).

The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be "buying a dividend" by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone's tax situation is unique, please consult your tax adviser before investing.

## **Services for Fund Investors**

---

### **Fund Exchanges**

An investor may purchase, in exchange for Institutional Advantage shares of the fund, Institutional shares of any Dreyfus Cash Management Fund, including Dreyfus California AMT-Free Municipal Cash Management, Dreyfus Cash Management, Dreyfus Government Cash Management, Dreyfus Government Prime Cash Management, Dreyfus Municipal Cash Management Plus, Dreyfus New York Municipal Cash Management, Dreyfus New York AMT-Free Municipal Cash Management, Dreyfus Tax Exempt Cash Management, Dreyfus Treasury & Agency Cash Management and Dreyfus Treasury Prime Cash Management. Your exchange request will be processed on the same business day it is received in proper form, provided that each fund is open at the time of the request. If the exchange is accepted at a time of day after one or both of the funds is closed (i.e., at a time after the NAV for the fund has been calculated for that business day), the exchange will be processed on the next business day. Any new account established through an exchange will have the same privileges as the original account (as long as they are available). There is currently no fee for exchanges.

### **Dreyfus Auto-Exchange Privilege**

Dreyfus Auto-Exchange privilege enables an investor to invest regularly (on a monthly, semi-monthly, quarterly or annual basis), in exchange for Institutional Advantage shares of the fund, in Institutional shares of any of the funds listed above, if the investor is a shareholder in such fund. There is currently no fee for this privilege.

### **Account Statements**

Every Dreyfus Fund investor automatically receives regular account statements. Each investor will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions the investor has received.

## Financial Highlights

These financial highlights describe the performance of the fund's Institutional Advantage shares for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These financial highlights have been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# For More Information

## **Dreyfus Institutional Cash Advantage Fund**

### **A series of Dreyfus Institutional Cash Advantage Funds**

**SEC file number: 811-21075**

More information on this fund is available free upon request, including the following:

#### **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

#### **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (and is legally considered part of this prospectus).

#### **Portfolio Holdings**

Dreyfus funds generally disclose their complete schedule of portfolio holdings monthly with a 30-day lag at [www.dreyfus.com](http://www.dreyfus.com) under Products and Performance. Complete holdings as of the end of the calendar quarter are disclosed 15 days after the end of such quarter. Dreyfus money market funds generally disclose their complete schedule of holdings daily. The schedule of holdings for a fund will remain on the website until the fund files its Form N-Q or Form N-CSR for the period that includes the dates of the posted holdings.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

#### **To Obtain Information**
