### PRICE INDICATOR KEY
- **AP**: Acceptable price
- **RT**: Real-time futures price
- **L**: Limit price
- **I**: Increment price
- **M**: Minus or minus than
- **N**: Not applicable
- **B**: Bid price
- **S**: Sell price
- **A**: Ask price
- **F**: Fair price
- **H**: High price
- **L**: Low price
- **LH**: Lower high price
- **PB**: Previous bid price
- **FD**: Fair deal price
- **DB**: Deal bid price

**Notes:**
- Prices are in U.S. dollars per contract or per unit.
- For commodities, the futures price is the price for delivery on a specific date in the future.
- The nominal price is the previous day's settlement price.
- The open interest is the number of contracts outstanding.
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.

**Notes:**
- The opening range is the price range in which the contract opened.
- The closing range is the price range in which the contract closed.
- The settl. price is the settlement price for the contract.
- The volume is the number of contracts traded.
- The interest is the number of contracts outstanding.
- The price increases are the amount by which the price increased or decreased.
- The high and low are the highest and lowest prices reached during the session.
