

CTS's T4 is a professional front-end software trading platform that offers the professional trader the ability to trade with ease, satisfaction, and total flexibility. Features of T4 include:

- A fully customizable screen layout which allows multiple layouts and the ability to modify fonts, colors, and columns with ease.
- Connectivity to many of the world's largest exchanges at ONE cost. That means you don't get charged for each individual exchange you trade.
- Charts (with over 30 studies and indicators, Market Profile and News
- One-click order submission and keyboard order submission.
- An expansive list of order types, including Market Orders, Limits, Stops, Stop-Limits, Trailing Stops, MITs, and GTCs, OCOs, and Auto OCOs.
- Advanced order types like market mode activation, time activation, and price activation.
- Advanced web tools that allow you to view your past order books and other account information online.
- Create your own customized functionality or your own black box system using T4's available open API at no additional charges. View this link for more information on our API.
