

Founded in 1996, FlexTrade Systems Inc., is the industry pioneer and global leader in broker-neutral algorithmic trading platforms and execution systems for equities, futures and foreign exchange. FlexTRADER, our flagship platform for algorithmic trading, is widely viewed as unique in the industry for its high performance and cross-asset capability. With offices in North America, Europe and Asia, FlexTrade has a worldwide client base spanning more than 120 buy- and sell-side firms, including many of the largest investment banks, hedge funds, asset managers, commodity trading advisors and institutional brokers.

Following is our primary trading solutions for equities, futures and FX.

FlexTRADER

FlexTRADER is our award-winning, fully customizable EMS offering you pre-defined trading strategies and tactics for both portfolio and single stock trading. The platform provides organically developed real-time and post-trade analytics as well as risk and cost optimized portfolio trade scheduling; advanced integrations with major OMSs; integrated real-time allocations and cash management; smart order routing; a sophisticated Dark Pool Router; a fully integrated high performance Complex Event Processing (CEP) engine; commission management; complete transaction and IOI quality management; and a dynamic strategy matrix.

FlexFutures

For futures trading, our FlexFutures solution comes fully loaded with many rules-based trading strategies, including VWAP and time slicing, as well as synthetic and contingent order types that are designed to reduce market impact and slippage, minimize risk, and improve trading performance. It is a fully scalable platform, configurable for multiple users over a network with every user allowed to customize the look of his or her own screen.

FlexFX

FlexFX, our award winning, algorithmic platform for FX, provides you with unparalleled direct access to liquidity (more than 35 banks, ECNs and exchanges) and a flexible assortment of tools for implementing intelligent trading strategies, including user-defined analytics for quantitative trading and order management. FlexFX also operates as a risk management tool, and enables you to create individual trading strategies with fully customizable analytics and visual alarms coupled with integrated quantitative capabilities, smart order routing connectivity and real-time data.
