www.patsystems.com

Patsystems provides high-performance electronic trading solutions with global market connectivity, complete end-to-end exchange solutions and comprehensive risk management tools. Every day the world's leading banks, FCMs, trading houses and professional traders rely on Patsystems' technology for electronic trading and trade processing in derivatives, FX, energy and other asset classes.

At the forefront of Patsystems' trading solution are two industry-leading front-end trading platforms, J-Trader and Pro-Mark. For traders who wish to develop their own trading application, Patsystems offers a proprietary and FIX API. Whether using Patsystems' front-ends or our API, Patsystems provides low-latency access to over 60 global markets, including all CME Group® markets.

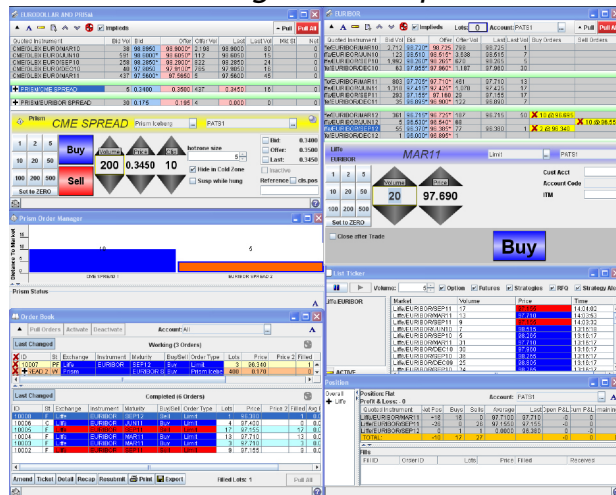

J-Trader: The ideal all-purpose trading tool

Patsystems J-Trader is a widely distributed, market-leading application that is simple to deploy, easy to use, and provides all the functionality you would expect of a successful and versatile front-end. Key benefits of J-Trader include:

- Multi-exchange spreading and one-click scalping
- Real-time profit and loss
- Single and multiple account trading
- Protection of orders with trailing stops and brackets
- Integrated charting with over 70 technical indicators
- Can be white-labeled

Pro-Mark: For high-volume professionals

Patsystems Pro-Mark is a premium front-end for the professional sector. It is the ideal tool for active professionals who use complex or demanding strategies across a wide range of products and exchanges. Key benefits of Pro-Mark include:

- Intelligent multi-exchange, multi-leg spreading
- Seamless integration with Microsoft Excel
- Advanced options trading functionality
- Stratgy creation: User Defined Spreads
- Supports advanced order types such as Icebergs and Ghost Orders
- Specific Broker functionality ("Broker Intervention")
