

## Chapter 17A

### Options on Rough Rice Futures

#### 17A00. SCOPE OF CHAPTER

This chapter is limited in application to put and call options on Rough Rice futures contracts. In addition to the rules of this chapter, transactions in options on Rough Rice futures shall be subject to the general rules of the Exchange insofar as applicable.

#### 17A01. OPTIONS CHARACTERISTICS

##### 17A01.A. Contract Months

Trading may be conducted in the nearby Rough Rice futures options contract month and any succeeding months, provided however, that the Exchange may determine not to list a contract month. For options that are traded in months in which Rough Rice futures are not traded, the underlying futures contract is the next futures contract that is nearest to the expiration of the option. For example, the underlying futures contract for the February option contract is the March futures contract.

##### 17A01.B. Trading Unit

One 2,000 hundredweight Rough Rice futures contract of a specified contract month.

##### 17A01.C. Minimum Fluctuations

The premium for Rough Rice futures options shall be in multiples of one-quarter (1/4) of one cent per hundredweight of a 2,000 hundredweight Rough Rice futures contract which shall equal \$5.00 per contract.

However, a position may be initiated or liquidated in Rough Rice futures options at a premium ranging from \$1.00 to \$4.00, in \$1.00 increments per option contract.

##### 17A01.D. Trading Hours

The hours of trading of options on Rough Rice futures contracts shall be determined by the Exchange. Rough Rice futures options shall be opened and closed for all months and strike prices simultaneously.

On the last day of trading in an expiring option, the expiring Rough Rice futures options shall be closed with a public call, made strike price by strike price, immediately following the close of the open outcry trading session for the corresponding Rough Rice futures contract.

##### 17A01.E. Exercise Prices<sup>1</sup>

Trading shall be conducted for put and call options with striking prices in integral multiples of twenty (20) cents per hundredweight per Rough Rice futures contract as follows: A referencing price shall be determined each quarter on the first business day in March, July, September, and December and shall equal the daily settlement price of the nearest expiring Rough Rice futures contract. The chosen referencing price shall be multiplied by 50 percent and divided by 0.20 without remainder to determine the reference number of 20 cent strikes.

1.

- a. At the commencement of trading for each option contract, the Exchange shall list a strike closest to the previous day's settlement price of the underlying Rough Rice futures contract (the at-the-money strike), and the reference number of strikes above and below the at-the-money strike. If the previous day's settlement price is midway between two strikes, the at-the-money strike shall be the larger of the two.
  - b. Over time, strikes shall be added as necessary to ensure that all strikes within the reference number of strikes above and below the previous day's settlement price in the underlying futures contract are listed.
2. All strikes will be listed prior to the opening of trading on the following business day. Upon demand and at the discretion of the Exchange, new out-of-current-range strike prices at regularly defined intervals may be added for trading on as soon as possible basis. The Exchange may modify the procedures for the introduction of strikes as it deems appropriate in order to respond to market conditions. As a new reference number of strikes is determined each quarter, existing strikes outside the newly determined strike ranges without open interest may be de-listed.

The decision as to whether a correction is acceptable will be made by the President of the Clearing House, or the President's designee, and such decision will be final.
