Span Reports

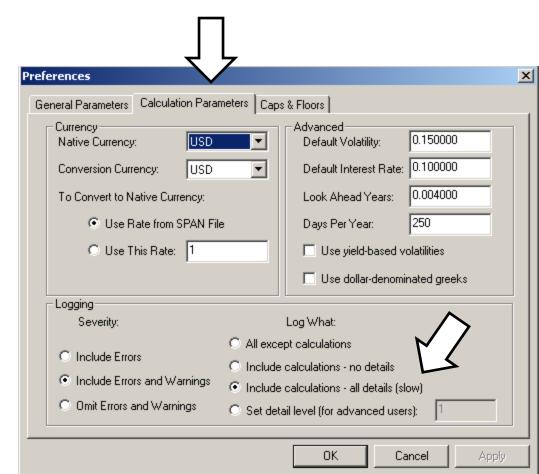

7-8-2009

Introduction

- This is a simple guide to understanding your
 Span Reports and how to access them all
- Before you start make sure that you have a copy of Span open a risk array loaded, and a position set up and calculated.

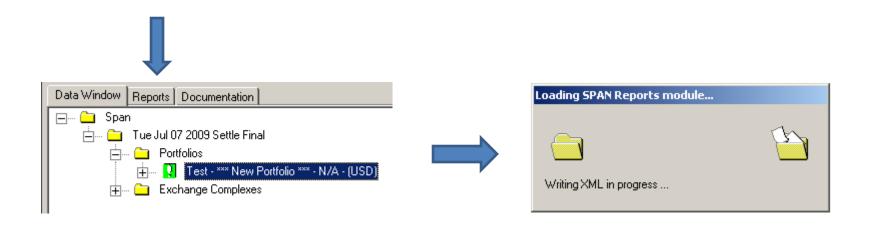

Setting your preferences

- First to be able to correctly see all of the reports make sure that your span log preferences are set correctly.
- Go to the Tolls Menu and choose Preferences
- Go to the Second tab
- Select the Include Calc
 - All details (slow)

Reports Tab

- Once you have a portfolio that has been calculated you can run the reports.
- To start simply click the second tab and wait for them to load.

Reports

 This will pull up a whole list of reports that you can see for your portfolio.

Positions Report

- This report will give you a breakdown of all of the products you have in a portfolio.
- These are listed in order of Combined Commodity (See the ES - mini SP- under the Big SP)

Exch	Comb	Exch	Product				Contract	Price	Not	Value

Spreads Detail Report

- The spreads detail report will show you any spreads that are formed from your positions
- To access this form you need to have a correctly formatted Span Log and have saved it so you can enter it in the following box when you click on the Spreads Detail report:

Explorer User Prompt	x
Script Prompt: Please specify the input log file:	OK Cancel
C:/Span4\data\span.log	

Saving your log file

- Once you have the preferences set correctly all of your span logs from then on will record the correct info
- Then after you calculate a portfolios margin requirements you will populate the log file with the info.
- Hit F11 or go to the View Menu and Click on Log
- This will pull up the log file at the bottom of your Span window
- Click the save button and remember

Spreads Detail Report

- Lastly specify where you saved your log file
- This will pull up all of the spreads that were formed from your portfolio.
- You can then see the credits or charges associated with each spread on the right
