

## Memorandum

---

TO: CME Group Trading Floor Community  
FROM: Trading Floor Operations  
DATE: 6/11/21  
SUBJECT: **Resources for Floor Traders and Brokers**

Following our recent announcement to permanently close all floor trading except the Eurodollar options pit, we want to advise you of a number of resources for floor traders and brokers during this transition.

- The [Special Executive Report](#) (SER) details the regulatory relief that will remain in place for floor brokers until September 30, 2021.
- In addition, the SER specifies timing for all products that we previously announced would be delisted entirely – or removed from the open outcry venue while remaining available on CME Globex and ClearPort. While some products are being delisted immediately, SOFR options will no longer be available for floor trading as of trade date Monday, June 28, 2021.
- The SER also includes an FAQ regarding billing and equipment for you and your firms.

In addition, we have received questions from the floor community regarding the location of the Eurodollar options pit going forward. We will be relocating the pit to the area adjacent to the current trading floor and the former CBOT grain room, and we anticipate the move will take a number of months with target completion by early 2022. We will be working with Eurodollar options pit firms and traders to make that transition as smooth as possible.
