

# Cross on CME Globex

Crossing functionality allows CME Group customers to submit cross orders that are the result of pre-execution communications pursuant to Rule 539.

Customers can call the [CME Global Command Center \(GCC\)](#) to obtain the Broker Match Guarantee (BMG) percentage for a given product.

Please see the [Market Regulation Advisory Notice](#) for a complete description of each exchange-supported crossing protocol.

The list of eligible products and cross types is available [here](#).

CME Globex currently supports **four** types of Cross orders: **Committed Cross (C-Cross)**, **Globex Cross (G-Cross)**, **Agency Cross (A-Cross)**, **RFQ + RFC Cross (R-Cross)**, which have the following attributes:

	C-Cross (Committed Cross)	G-Cross (Globex Cross)	A-Cross (Agency Cross)	R-Cross (RFQ + RFC Cross)
Customer sends RFQ	No	No	Yes	Yes
Customer sends RFC	No	No	Yes	Yes <b>Note:</b> Upon receipt of the Request for Cross (tag 35-MsgType=s) message, CME Globex will automatically publish an RFQ (tag 35-MsgType=R) message with tag 54-Side equal to '8' (Cross).
Cross Market State	Yes <b>Note:</b> The five (5) second period begins when the market data Pre-Cross state (tag 35-MsgType=f, tag-326-SecurityTradingStatus=24) is disseminated.	No <b>Note:</b> The five (5) second period begins when the first message is entered.	No <b>Note:</b> The order entry process and timing for A-Cross is slightly different from the other protocols, and should be followed in accordance with the Market Regulation Advisory Notice link above for Pre-Execution Communications Rule 539.	Yes
