

SBE Streamlined - FTP Site Information

An FTP site (<ftp://ftp.cmegroup.com>) is used to disseminate schemas and market data configuration information. This FTP site contains the Schema and Configuration files for all events. Schema and market data configuration details for the Production environment are only available to customers after the certification process is complete.

Information applies as follows in the table:

- Environment - specific environment (i.e., Certification, New Release, Production).

The AutoCert+ tool will indicate which environment you need to connect to for certification. For additional information on AutoCert+ access, refer to the [AutoCert+ Access Guide](#).

- Service - the Schema or Configuration service.
- FTP Site - address of FTP site.
- Directory Location - identifies the directory.
- Client System Update Schedule - client systems should download updates according to the schedule specified.

Environment	Service	FTP Site	Directory Location	Client System Update Schedule
New Release	Schema	ftp.cmegroup.com	/SBEMix/NRCert/StrTemplates/	Sunday prior to market open
New Release	Configuration	ftp.cmegroup.com	/SBEMix/NRCert/StrConfiguration/	Daily
New Release AutoCert+	Schema	ftp.cmegroup.com	/SBEMix/NRAutoCertPlus/StrTemplates/	Sunday prior to market open
New Release AutoCert+	Configuration	ftp.cmegroup.com	/SBEMix/NRAutoCertPlus/StrConfiguration/	Daily
Production	Schema	ftp.cmegroup.com	/SBEMix/Production/StrTemplates/	Sunday prior to market open
Production	Configuration	ftp.cmegroup.com	/SBEMix/Production/StrConfiguration/	Daily
