

MDP 3.0 - Market by Order - Book Management

CME Globex Market by Order (MBO) disseminates individual orders and quotes at every price level for the given instrument. MBO allows customers to view position(s) while preserving market participant anonymity.

This page describes the following MBO book management features:

- [MBO Book Management Processing Examples](#)
 - [Limit Order - New Action Example](#)
 - [Modify Order - Update MBO Quantity of Resting Order Example](#)
 - [Cancel Resting Order - MBO Update Only Example](#)

CME Globex maintains the Market by Order (MBO) depth view with the following data blocks:

- New - create/insert a new order (tag 37708-OrderUpdateAction=0 or tag 279-MDUpdateAction=0)
- Update - change order information (tag 37708-OrderUpdateAction=1 or tag 279-MDUpdateAction=1)
- Delete - remove an order (tag 37708-OrderUpdateAction=2 or tag 279-MDUpdateAction=2)

 Depending on the SBE template, either 37708-OrderUpdateAction or tag 279-MDUpdateAction order action will be used for book updates. See [MDP 3.0 - Market by Order - Book Management](#) for more information.

A book is built from a series of data blocks which indicate whether an order is to be inserted (New), changed (Update), or removed (Delete). The incremental instruction approach assumes the use of the [Market Data Incremental Refresh \(tag 35-MsgType=X\)](#) message.

- Order Priority (tag 37707-MDOrderPriority), from lowest to highest values, is used to position the order against other orders of the same instrument side, and price.
- To build the full depth MBO order book, each order must be sorted by instrument side, and price (in descending order for Bids and ascending order for Asks). Then the order priority number must be applied only to the orders of the same price/ side.

In the example below, 37-OrderID 111 has a higher book priority (1) than OrderID 901 despite OrderID 901 having a lower tag 37707-MDOrderPriority value.

 For tag 37707-MDOrderPriority, a lower value is a higher priority.

Book Priority	MDOrderPriority	OrderID	Quantity	Price	Side
1	653654	111	10	1000	Buy
2	703699	759	120	1000	Buy
3	765935	201	30	1000	Buy
4	524123	901	50	980	Buy

For MBO, there is no maximum number of orders or depth allowed on the book. All MBO book updates for an instrument within an event must be processed before the MBO book is valid.

MBO Order Priority is based on the sequence of iLink orders received by a CME Globex market segment (tag 1300-MarketSegmentID) and will be sent accordingly regardless of the match algorithm.
[Implied order book](#) information is not sent in MBO format.

MBO Book Management Processing Examples

The following section shows examples using the MBO book update actions: new, update and delete.

Limit Order - New Action Example

This example shows a new limit bid order accepted and added to the first level of the book, since there are no resting bid orders.

 Priority may not be sequential for tag 37707-MDOrderPriority outside of price (tag 270-MDEntryPx). Therefore, systems must first sort by price (tag 270-MDEntryPx), then by priority (tag 37707-MDOrderPriority) to determine the book order.

Starting Market by Order (MBO) Book

Order Priority	BidOrderID	Bid Quantity	Bid Book Price	Book Priority	Ask Book Price	Ask Quantity	Ask OrderID	Order Priority
723654	111	10	1000	1	1020	5	107	833653
723699	759	120	1000	2	1030	7	800	713752
724123	901	50	980	3	1030	12	121	723688
722598	959	7	970	4	1040	20	194	733653
725111	987	25	960	5	1040	25	295	733667
722095	555	30	950	6	1040	15	1001	733761
722512	721	100	950	7	1040	5	858	734775

New Update Action

Order added to Bid side level 1 at Limit Price of 1010 and a quantity of 50.

Incremental Refresh Market Data

Tag Number	Tag Name	Value	Description
270	MDEntryPx	1010	
37	OrderID	557	
37706	MDDisplayQty	50	
37707	MDOOrderPriority	723766	
37708	OrderUpdateAction	0	0 = new

This example uses tag 37708-OrderUpdateAction, but depending on the SBE template, tag 279-MDUpdateAction may be used instead. See [MDP 3.0 - Incremental Refresh SBE Template Book Processing](#) for more information.

Final Market by Order (MBO) Book

Order Priority	BidOrderID	Bid Quantity	Bid Book Price	Book Priority	Ask Book Price	Ask Quantity	Ask OrderID	Order Priority
723766	557	50	1010	1	1020	5	107	833653
723654	111	10	1000	2	1030	7	800	733752
723699	759	120	1000	3	1030	12	121	723688
724123	901	50	980	4	1040	20	194	733653
722598	959	7	970	5	1040	25	295	733667
725111	987	25	960	6	1040	15	1001	733761
722095	555	30	950	7	1040	5	858	734775
722512	721	100	950	8				

Modify Order - Update MBO Quantity of Resting Order Example

This example shows the update performed on an existing book when a an order modify is processed for MBO. The order will lose priority at the price level (950).

Priority may not be sequential for tag 37707-MDOOrderPriority outside of price. Therefore, systems must first sort by price then by tag 37707-MDOOrderPriority to determine priority.

Starting Book Market by Order (MBO) Book

Order Priority	BidOrderID	Bid Quantity	Bid Book Price	Book Priority	Ask Book Price	Ask Quantity	Ask OrderID	Order Priority
723654	111	10	1000	1	1010	5	107	833653

723699	759	120	1000	2	1020	7	800	713752
724123	901	50	980	3	1020	12	121	723688
722598	959	7	970	4	1030	20	194	733653
725111	987	25	960	5	1030	25	295	733667
722095	555	30	950	6	1030	15	1001	733761
722512	721	100	950	7	1030	5	858	734775

Modify Bid Quantity (tag 35-MsgType=X) Data Block

OrderID 555 quantity is increased from 30 to 50. The order loses priority in the book.

Incremental Refresh Market Data

Tag Number	Tag Name	Value	Description
270	MDEntryPx	950	
37	OrderID	555	
37706	MDDisplayQty	50	
37707	MDOOrderPriority	722787	
37708	OrderUpdateAction	1	1 = Update

This example uses tag 37708-OrderUpdateAction, but depending on the SBE template, tag 279-MDUpdateAction may be used instead. See the [MBO Incremental Refresh SBE Message Processing](#) section for more information.

Market by Order (MBO) Final Order Book

Order quantity is increased from **30** to **50**. OrderID 555 loses priority in the book, and Order Priority changes from 722095 to 722787.

Order Priority	Bid OrderID	Bid Quantity	Bid Book Price	Book Priority	Ask Book Price	Ask Quantity	Ask OrderID	Order Priority
723654	111	10	1000	1	1010	5	107	833653
723699	759	120	1000	2	1020	7	800	713752
724123	901	50	980	3	1020	12	121	723688
722598	959	7	970	4	1030	20	194	733653
725111	987	25	960	5	1030	25	295	733667
722512	721	100	950	6	1030	15	1001	733761
722787	555	50	950	7	1030	5	858	734775

Cancel Resting Order - MBO Update Only Example

Cancel a resting order at price **850** which is outside the maximum market depth of 10 for the MBP book, therefore only an MBO update is sent.

Starting Market by Order (MBO) Book

Order Priority	Bid OrderID	Bid Book Quantity	Bid Book Price	Book Priority	Ask Book Price	Ask Book Quantity	Ask OrderID	Order Priority
723654	111	10	1000	1	1005	10	205	724866
723699	759	120	1000	2	1010	20	206	724333
724123	901	50	980	3	1020	15	207	713998
725750	365	10	980	4	1020	50	209	723444
722598	959	7	970	5	1030	70	215	723767
725111	987	25	960	6				
725392	555	50	950	7				
724002	844	35	940	8				
724169	888	50	930	9				

724731	677	5	900	10				
723373	689	75	880	11				
724815	702	40	870	12				
725212	251	25	850	13				
725731	890	20	820	14				

Market by Price (MBP) Book

Bid Number Of Orders	Quantity	Price	Price Level	Ask Price	Quantity	Ask Number Of Orders
2	130	1000	1	1010	5	1
2	60	980	2	1020	19	2
1	7	970	3	1030	65	3
1	25	960	4			
1	50	950	5			
1	35	940	6			
1	50	930	7			
1	5	900	8			
1	75	880	9			
1	40	870	10			

Delete Bid Quantity (tag 35-MsgType=X)

OrderID 251 for quantity of 25 at price of 850 is cancelled.

Tag Number	Tag Name	Value	Description
270	MDEntryPx	850	
37	OrderID	251	
37706	MDDisplayQty	25	
37707	MDOOrderPriority	725212	
279	MDUpdateAction	2	2 = Delete

This example uses tag 279-MDUpdateAction, but depending on the SBE template, tag 37708-OrderUpdateAction may be used instead. See the [MDP 3.0 - Incremental Refresh SBE Template Book Processing](#) section for more information.

Final Order Market by Order (MBO) Book

OrderID 251 for quantity of 25 at price of 850 is cancelled.

Order Priority	Bid OrderID	Bid Book Quantity	Bid Book Price	Book Priority	Ask Book Price	Ask Book Quantity	Ask OrderID	Order Priority
723654	111	10	1000	1	1005	10	205	724866
723699	759	120	1000	2	1010	20	206	724333
724123	901	50	980	3	1020	15	207	713998
725750	365	10	980	4	1020	50	209	723444
722598	959	7	970	5	1030	70	215	723767
725111	987	25	960	6				
725392	555	50	950	7				
724002	844	35	940	8				
724169	888	50	930	9				
724731	677	5	900	10				
723373	689	75	880	11				
724815	702	40	870	12				

725731	890	20	820	13				
--------	-----	----	-----	----	--	--	--	--

Market by Price (MBP) Book - No Change

The canceled order at price of **850** is below the disseminated 10 levels, therefore there are no changes to the MBP order book.

Bid Number Of Orders	Quantity	Price	Price Level	Ask Price	Quantity	Ask Number Of Orders
2	130	1000	1	1010	5	1
2	60	980	2	1020	19	2
1	7	970	3	1030	65	3
1	25	960	4			
1	50	950	5			
1	35	940	6			
1	50	930	7			
1	5	900	8			
1	75	880	9			
1	40	870	10
