

Client Systems Support Services

In addition to [Trading](#), [Trade Reporting](#), [Risk Management](#), and [CME Clearing Services](#) services, CME Group also provides the following client system support services:

Client Application Testing and Certification - available for clients to test new system functionality and in certain cases may be required.

Disaster Recovery - provides the guidelines for recovery procedures for client systems in the event of a CME Globex or Clearing fail over.

Network Connectivity - describes the connectivity options available for client systems to connect to CME Group environments.
