

iLink 2 Order Status Request

The **Order Status Request (tag 35-MsgType=H)** message [requests the status](#) of a working order (e.g. resting or partially filled).

The number of active or queued Order Status Requests (OSR) per iLink session is limited to 50. OSRs that exceed the allowed number of active and queued requests will be rejected with a [Session Level Reject \(tag 35=3\)](#) with tag 58=**Exceeded maximum number of unacknowledged OSR requests**. New OSRs may be submitted as each OSR is fulfilled.

CME Group recommends that customers use the Order Mass Status Request to obtain complete order information. For best results when using OSR, customers should wait for each request to be fulfilled before submitting a new request.

Tag	Name	FIX Type	Enumeration	Req	Description
Standard Header - Client to CME Globex					
35	MsgType	String (2)	H=Order Status Request	Y	Header tag identifying message type.
11	ClOrdID	String (20)		Y	The tag 11-ClOrdID value for the Order Status Requests MUST be equal to the tag 11-ClOrdID value of the order whose status is being requested. In the case of an order chain, for best performance, use the tag 11-ClOrdID value of the last order in the chain. Refer to iLink - CME Globex Identifiers for more information.
37	OrderID	String (17)		Y*	Unique ID assigned by CME Globex to identify orders. Unique per instrument per trading session. Note: Tag 37 value sent from client system to CME Globex must exactly match the value CME Globex assigned.
54	Side	Char(1)	1=Buy 2=Sell	Y	Side of order.
55	Symbol	String (6)		N	This tag contains the Group Code of the instrument.
1028	Manual Order Indicator	Boolean(1)	Y=manual N=automated	Y*	'N' indicates the message was generated by automated trading logic. Note: iLink messages containing a value other than 'Y' or 'N' in this tag will be rejected. This tag is subject to Rule 536.B.2 <i>Electronic Audit Trail Requirements for Electronic Order Routing/Front-End Systems</i> .
60	Transact Time	UTCTimestamp(21)		Y*	UTC format YYYYMMDD-HH:MM:SS.sss e.g. 20091216-19:21:41.109
107	Security Desc	String (20)		Y*	Unique instrument identifier. Future Example: GEZ8 Option Example: GEZ9 C9375
167	Security Type	String (6)	FUT=Future OPT=Option IRS=Interest Rate Swap FXSPOT=FX Spot	N	Indicates instrument is future or option. Note: for options strategy including UDS COMBO or COVERED, send OPT. For UDS Futures, send FUT.
9717	CorrelationClOrdID	String (20)		Y*	This tag should contain the same value as the tag 11-ClOrdID of the original New Order (tag 35-MsgType=D) message and is used to correlate iLink messages associated with a single order chain. Refer to iLink - CME Globex Identifiers for more information.
iLink 2 Standard Message Trailer					
					End of message.
