

CME Connectivity Offerings

CME Group offers customers access to its network from a set of connection options that enable reliable, robust, and cost-efficient access. The links below provide technical connectivity information for customers wanting to connect to CME Group, BrokerTec and/or EBS US and EU markets. CME Group's network and connectivity services are being enhanced to support BrokerTec and EBS connectivity.

BrokerTec connectivity leverages CME Group's network, existing connectivity offerings and new offerings: GLink - Secaucus, GLink - Slough, CME Globex Hub - Aurora and EConnect - NY5.

EBS connectivity leverages CME Group's network, existing connectivity offerings and new offerings: GLink – Secaucus, GLink – Slough and RNet in Secaucus, Slough and Tokyo.

CME Group's network connects to the CME Globex Platform in Aurora and BrokerTec and EBS Globex Platforms in Secaucus and Slough.

CME Group's offerings, GLink, EConnect, and Globex Hub, can be entitled to route to BrokerTec or EBS Globex Platforms in Secaucus and Slough as well as the CME Globex Platform in Aurora. Separate ports are required to access the different markets. For example, a customer's EConnect service from 111 8th Ave and 165 Halsey can be configured to access CME Globex in Aurora or BrokerTec resources in Secaucus or Slough or EBS resources in Secaucus or Slough, but only one market per connection.
