

EBS Order Entry Service Gateway

This page shows the two Order Entry Service Gateway (OESGW) models for EBS customers to register administrative information.

If the EBS customer opts to pre-register their administrative information, they **MUST** use the same iLink 3 session to connect to the Service Gateway using FIXP protocol, and submit Party Details Definition Request messages as follows

 The information on this page is not applicable if the EBS customer opts for [on-demand administrative information](#).

EBS OESGW for CGW Sessions

EBS OESGW for MSGW Sessions
