

# Margin Service API - Status - Get

The get status request returns a http code from CME CORE indicating whether that product is available for margining at that time.

- [Description](#)
- [Request](#)
- [Response](#)
- [Errors](#)
- [Examples](#)

<b>Entity</b>	<a href="#">Margins</a>
<b>Action</b>	Get
<b>URL</b>	/status/{prdt}
<b>HTTP Method</b>	GET
<b>Parameter Input</b>	Yes
<b>XML Input</b>	No
<b>Multiple Output</b>	No
<b>Synchronous</b>	Yes

## Description

This request allows the Client to get or retrieve the status (heartbeat) of CME CORE by product. Status can be checked for IRS, Futures, FX, and Delta Ladder. Leaving product blank returns combined status of all products. If product is available for margining at that time Client will receive a 200 OK response.

## Request

Request	Name	Required
/margins/status/{product}	Requesting User ID	No

## Response

Http Code	Name	Required
200	OK - Margining available	No

## Errors

Http Code	Description
404	Returned if GET /margins/status is sent and the Margin Services API is unavailable.
501	Returned if Client enters an Incorrect product.
503	Returned if GET /margins/status/{product} is sent and the product is unavailable.

## Examples

Request	Http Code Response	Notes
GET /margins/status/IRS	200	Status of Interest Rate Swap margining
GET /margins/status/FUT	200	Status of Future & Options margining
GET /margins/status/FX	200	Status of Forex margining

GET /margins/status/DELTA_LADDER	200	Status of Delta Ladder margining
