

# iLink 3 Execution Report - Status

Execution Report - Status message is sent in response to Order Status Request or Order Mass Status Request.

**Bolded red text** indicates support for EBS Market.

35=8, 150=I

| Tag   | Name                      | Binary Type | Binary Length | Req | Enumeration | Description  |
|-------|---------------------------|-------------|---------------|-----|-------------|--|
| 9726  | SeqNum                    | uint32      | 4             | Y   |             | Sequence number assigned to this message.<br><br>The max value is 999999999 which is 1 short of 1 billion.   |
| 39001 | UUID                      | uint64      | 8             | Y   |             | Matches Establish.UUID used to establish the connection.   |
| 58    | Text                      | String256   | 256           | N   |             | Reject reason details.<br><br>Only for descriptive rejects.  |
| 17    | ExecID                    | String40    | 40            | Y   |             | Globally unique identifier for each Execution Report message assigned by exchange.   |
| 5392  | SenderId                  | String20Req | 20            | Y   |             | For futures and options markets: represents Operator ID.<br><br>For <b>EBS and</b> fixed income markets: represents the Entering Trader. <b>For EBS this value must be 3 characters.</b><br><br>This value represents the individual or team submitting the message and is subject to registration requirements and character limits as required by Rule 576 and the Advisory below:<br><br><a href="https://www.cmegroup.com/rulebook/files/cme-group-Rule-576.pdf">https://www.cmegroup.com/rulebook/files/cme-group-Rule-576.pdf</a><br><br>In FirmSoft and Global Command Center queries for order status and cancellations, this value must be exact.     |
| 11    | ClOrdID                   | String20Req | 20            | Y   |             | Unique identifier for Order as assigned by client system. Uniqueness must be guaranteed within a single trading day.<br><br>Firms, particularly those which electronically submit multi-day orders, trade globally, or throughout market close periods, should ensure uniqueness across days.  |
| 1505  | PartyDetailsListRequestID | uint64      | 8             | Y   |             | The unique identifier of the Party Details Definition Request Acknowledgment associated with this message; this is the value submitted on the inbound message.<br><br>For pre-registered messages: <ul style="list-style-type: none"> <li>• Unique ID from Party Details Definition Request Acknowledgment message</li> <li>• PartyDetailsListRequestID0.</li> </ul> For on-demand messages: <ul style="list-style-type: none"> <li>• If not registered beforehand through iLink then Party Details Definition Request message will be sent along with the business message and will immediately precede it</li> <li>• PartyDetailsListRequestID=0.</li> </ul> |
| 37    | OrderID                   | uint64      | 8             | Y   |             | Globally unique identifier for each order assigned by the exchange.  |
| 44    | Price                     | PRICENULL9  | 8             | N   |             | Price per share or contract.   |
| 99    | StopPx                    | PRICENULL9  | 8             | N   |             | The stop price of a stop limit and stop protect order (Conditionally present if tag 40-OrdType=4).   |
| 60    | TransactTime              | uint64      | 8             | Y   |             | Time the transaction represented by this Execution Report (35=8) occurred. Expressed as nanoseconds since epoch time to millisecond accuracy.  |
| 5297  | SendingTimeEpoch          | uint64      | 8             | Y   |             | Time when the message is sent. 64-bit integer expressing the number of nanoseconds since midnight January 1, 1970.   |
| 2422  | OrderRequestID            | uint64      | 8             | Y   |             | OrderRequestID used to identify a request to enter, modify, or delete an order. Echoed back on the Execution Report.<br><br>For the unsolicited events (e.g. fills and end of day eliminations), echo the value on the ExecutionReport representing the last accepted OrderRequestID on the corresponding order.   |
| 790   | OrderStatusRequestID      | uint64NULL  | 8             | N   |             | Used to uniquely identify a specific Order Status Request message.   |
| 584   | OrderMassStatusRequestID  | uint64NULL  | 8             | N   |             | Unique ID of Order Mass Status Request as assigned by the client system.   |
| 548   | CrossID                   | uint64NULL  | 8             | N   |             | Identifier for a Cross order. Will be present if Execution Report is in response to a Cross order.   |
| 961   | HostCrossID               | uint64NULL  | 8             | N   |             | Host-assigned entity ID used to reference all components of a Cross: sides + strategy + legs.<br><br>The HostCrossID also links components of the Cross order. For example, each individual Execution Report associated with the order will contain HostCrossID to tie them to the original Cross order.   |

|      |            |               |   |   |  |   |
|------|------------|---------------|---|---|--|---|
| 9537 | Location   | String5Req    | 5 | Y |  | <p>ISO identifier of the physical location of the individual or team head trader identified by the tag 5392 (SenderID) in the message.</p> <p>The first two bytes as per ISO 3166-1, identify the country (e.g., JP = Japan, CN = China).</p> <p>The next three bytes indicate a comma-delimited state or province code (e.g., CA = California, QC = Quebec).</p> <p>For valid values, refer to <a href="http://ftp.cmegroup.com/fix/coo">ftp.cmegroup.com/fix/coo</a>.</p> <p><b>Market Regulation requires only the submission of the two first characters of tag 9537-Location for all countries with the exception of Canada. For Canada, the 5 bytes including the province code must be submitted.</b></p> <p><b>Note: this field is optional for EBS Market and eFIX Matching Service instruments.</b></p> |
| 48   | SecurityID | Int32         | 4 | Y |  | Security ID as defined in the market data Security Definition message.  |
| 38   | OrderQty   | uInt32        | 4 | Y |  | Number of shares or contracts ordered.  |
| 14   | CumQty     | uInt32        | 4 | Y |  | Total quantity filled.  |
| 151  | LeavesQty  | uInt32        | 4 | Y |  | <p>Quantity open for further execution.</p> <p>Only present for outright and spreads, not spread legs.</p>  |
| 110  | MinQty     | uInt32NULL    | 4 | N |  | <p>Minimum quantity of an order for immediate execution.</p> <p>The value of MinQty must be between 1 and the value in tag 38-OrderQty.</p> <p>If set to 0 or default null value then it means that minimum quantity is <i>n</i>.</p> <p>If the quantity present in tag 110 <b>cannot</b> be immediately executed, the entire order is eliminated.</p>  |
| 1138 | DisplayQty | uInt32NULL    | 4 | N |  | <p>The quantity to be displayed. Required for display quantity orders.</p> <p><b>Note:</b> on orders, this value specifies the qty to be displayed; on Execution Reports this value indicates the currently displayed quantity.</p>   |
| 432  | ExpireDate | LocalMktDate  | 2 | N |  | <p>Date of order expiration (last day the order can trade), always expressed in terms of the local market date.</p> <p>Sent in number of days since Unix epoch.</p>   |
| 39   | OrdStatus  | OrderStatus   | 1 | Y | <ul style="list-style-type: none"> <li>• OrdStatus =0 (New)</li> <li>• OrdStatus =1 (Partially Filled)</li> <li>• OrdStatus =2 (Filled)</li> <li>• OrdStatus =4 (Cancelled)</li> <li>• OrdStatus =5 (Replaced)</li> <li>• OrdStatus =C (Eliminated)</li> <li>• OrdStatus =8 (Rejected)</li> <li>• OrdStatus =U (Undefined)</li> <li>• <b>OrdStatus =6 (Pending Cancel)</b></li> <li>• <b>OrdStatus =E (Pending Replace)</b></li> </ul> | Identifies status of order  |
| 150  | ExecType   | ExecTypStatus | 0 | Y | ExecType=I (Status)  | <p>Describes the specific Execution Report as order status.</p> <p>Constant value.</p>  |
| 40   | OrdType    | OrderType     | 1 | Y | <ul style="list-style-type: none"> <li>• OrdType=1 (Market order with protection)</li> <li>• OrdType=2 (Limit order)</li> <li>• OrdType=4 (Stop limit order)</li> <li>• OrdType=K (Market limit order)</li> </ul>  | Order type.   |

|      |                      |                   |   |   |  |   |
