Single Stock Futures

STOCKS AND FUTURES. BETTER TOGETHER.

Gain exposure to over 50 leading U.S. stocks, all with the power of futures. Micro- and larger-sized Single Stock futures are financially settled and offer precise, capital-efficient exposure to top names in benchmark U.S. indices, such as the S&P 500, Nasdaq-100 and Russell 1000.

Why trade Single Stock futures?

Get around-the-clock trading access

Futures trade nearly 24 hours a day – while the stock market sleeps – allowing you to trade on your schedule and respond quickly to market-moving events.

Trade with less upfront capital

Unlike traditional stocks, futures allow you to trade with margin to control a larger position with a lower amount of upfront capital.

Go short or long with ease

Whether a company's stock price moves up or down, seamlessly take a long or short position – no stock borrowing fees required

Enjoy financially settled contracts

Single Stock futures are financially settled, removing the need to manage physical share delivery and allowing you to access one of the most liquid times of the day.

Expand your trading toolkit

In addition to directional views, execute advanced spread strategies by isolating single stock risk without impacting your broader portfolio exposure.

Choose the size that fits your strategy

Tailor your portfolio with two contract sizes: Use the larger contract to scale your positions or the Micro-sized contract to fine-tune your exposure.

Explore the differences between Single Stock futures, stocks and stock options

	SINGLE STOCK FUTURES	STOCKS & ETFS	STOCK OPTIONS
TRADING HOURS	23 hours a day (Sunday – Friday).	9:30 a.m. – 4:00 p.m ET (Monday – Friday)	
GOING SHORT	Seamless – without borrowing fees or locate	Often involves borrowing fees and restrictions	Seamless – without borrowing fees or locate
CAPITAL EFFICIENCY	Lower margin	Requires more capital (fully funded or limited margin)	Lower margin
SETTLEMENT	Financially settled; no ownership of shares	Typically involves ownership of shares	Physical delivery
DIVIDENDS	Included in the futures price. No risk of early exercise	Holders receive cash; shorts must pay	The presence of dividends creates early exercise risk
RISK	Linear Payout		Non-linear payout; early exercise risk present
