For example, the underlying futures contract for the February option contract is the March futures contract. For short-dated options on new crop futures, the underlying futures contract is the December futures contract that is nearest to the expiration of the option.

13A01.E. Exercise Prices

At the commencement of trading for each option contract, the Exchange shall list a strike closest to the previous day’s settlement price of the underlying Soybean Meal futures contract (the at-the-money strike), and strikes in a range of 50 percent above and below the at-the-money strike. If the previous day’s settlement price is midway between two strikes, the at-the-money strike shall be the larger of the two.
   b. Over time, strikes shall be added as necessary to ensure that all strikes within 50 percent of the previous day’s settlement price in the underlying futures are listed.

   b. Over time, new 5 dollar strike prices shall be added to ensure that all strikes within 50 percent of the previous day’s settlement price in the underlying futures are listed.

3. All strikes will be listed prior to the opening of trading on the following business day. Upon demand and at the discretion of the Exchange, new out-of-current-range strike prices at regularly defined intervals may be added for trading on as soon as possible basis. The
Exchange may modify the procedures for the introduction of strikes as it deems appropriate in order to respond to market conditions. As new strikes are added, existing strikes outside the newly determined strike ranges without open interest may be de-listed.
