

## Chapter 15A Options on Oat Futures

### 15A00. SCOPE OF CHAPTER

This chapter is limited in application to put and call options on Oat futures contracts. In addition to the rules of this chapter, transactions in options on Oat futures shall be subject to the general rules of the Exchange insofar as applicable.

### 15A01. OPTIONS CHARACTERISTICS

#### 15A01.A. Contract Months

Trading may be conducted in the nearby Oat futures options contract month and any succeeding months, provided however, that Exchange may determine not to list a contract month. For options that are traded in months in which Oat futures are not traded, the underlying futures contract is the next futures contract that is nearest to the expiration of the option. For example, the underlying futures contract for the February option contract is the March futures contract.

#### 15A01.B. Trading Unit

One 5,000 bushel Oat futures contract of a specified contract month.

#### 15A01.C. Minimum Fluctuations

The premium for Oat futures options shall be in multiples of one-eighth (1/8) of one cent per bushel of a 5,000 bushel Oats futures contract which shall equal \$6.25 per contract.

However, a position may be initiated or liquidated in Oat futures options at a premium ranging from \$1.00 to \$6.00, in \$1.00 increments per option contract.

#### 15A01.D. Trading Hours

The hours of trading for options on Oat futures contracts shall be determined by the Exchange. Oat futures options shall be opened and closed for all months and strike prices simultaneously or in such other manner as determined by the Exchange.

#### 15A01.E. Exercise Prices<sup>1</sup>

Trading shall be conducted for put and call options with striking prices in integral multiples of five (5) cents and ten (10) cents per bushel per Oat futures contract as follows:

1.
  - a. At the commencement of trading for each option contract, the Exchange shall list a strike closest to the previous day's settlement price of the underlying Oat futures contract (the at-the-money strike, and strikes in integral multiples of ten cents in a range of 50 percent above and below the at-the-money strike. If the previous day's settlement price is midway between two strikes, the at-the-money strike shall be the larger of the two.
  - b. Over time, new ten cent strikes will be added to ensure that all strikes within 50 percent of the previous day's settlement price in the underlying futures contract are listed.
2.
  - a. At the commencement of trading for options that are traded in months in which Oat futures are not traded, and for standard option months the business day they become the second listed month, the Exchange shall list a strike closest to the previous day's settlement price of the underlying Oat futures contract (the at-the-money strike), and strikes in integral multiples of five cents in a range of 25 percent above and below the at-the-money strike. If the previous day's settlement price is midway between two strikes, the at-the-money strike shall be the larger of the two. For example, five-cent strike price intervals for the September contract would be added on the first business day after the expiration of the July options contract.
  - b. Over time, new five-cent strike prices will be added to ensure that all strikes within 25 percent of the previous day's settlement price in the underlying futures are listed.

3. All strikes will be listed prior to the opening of trading on the following business day. Upon demand and at the discretion of the Exchange, new out-of-current-range strike prices at regularly defined intervals may be added for trading on as soon as possible basis. The Exchange may modify the procedures for the introduction of strikes as it deems appropriate in order to respond to market conditions. As new 5 and 10 cent strikes are added, existing strikes outside the newly determined strike ranges without open interest may be de-listed.
