Chapter 259A
Options on South African Rand/U.S. Dollar (ZAR/USD) Futures

259A00. SCOPE OF CHAPTER
This chapter is limited in application to options on South African rand/U.S. dollar futures. In addition to this chapter, options on South African rand/U.S. dollar futures shall be subject to the general rules and regulations of the Exchange insofar as applicable.

For purposes of this chapter, unless otherwise specified, times referred to herein shall refer to and indicate Chicago time.

For purposes of this chapter, unless otherwise specified, times referred to herein shall refer to and indicate Chicago time.

Options contracts covered by this chapter may also be referred to as:
ZAR/USD Monthly Options
ZAR/USD Weekly Friday Options

259A01. OPTIONS CHARACTERISTICS
259A01.A. Contract Months, Trading Hours, and Trading Halts
Options contracts shall be listed for such contract months (i.e., expirations) and scheduled for trading during such hours, except as indicated below, as may be determined by the Exchange.

259A01.B. Trading Unit
The trading unit shall be an option to buy, in the case of the call, or to sell, in the case of the put, one South African rand/U.S. dollar futures contract as specified in Chapter 259.

259A01.C. Price Increments
The price of an option shall be quoted in U.S. dollars per South African rand. Each $0.000025 per South African rand (two and one-half points) shall represent $12.50. For example, a quote of .000875 represents an option price of $437.50 (87.5 points x $5.00 per point). The minimum fluctuation shall be two and one-half points (also known as one tick). A trade may also occur at a price of $.0000125 ($6.25, also known as one-half tick), whether or not it results in the liquidation of positions for both parties to the trade.

259A01.D. Underlying Futures Contract
1. Monthly Options
   The underlying futures contract is the same as the option contract month (i.e., the January futures is the contract underlying the January option).

2. Weekly Friday Options
   For weekly Friday South African rand/U.S. dollar options that expire before the monthly option, the underlying futures contract is the same as the option contract month. For weekly Friday South African rand/U.S. dollar options that expire after the monthly option, the underlying futures contract is the futures contract of the next consecutive calendar month. For example, if Friday, May 9th is the expiration of the monthly option (whose underlying futures contract is the May futures), then for the option expiring Friday, May 2nd, the underlying futures contract is the May futures. In this same example, for the options expiring on the Fridays, May 16th, May 23rd, and May 30th, the underlying futures contract is the June futures.

259A01.E. Position Limits, Exemptions, Position Accountability and Reportable Levels
The applicable position limits and/or accountability levels, in addition to the reportable levels, are set forth in the Position Limit, Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5.

A Person seeking an exemption from position limits for bona fide commercial purposes shall apply to the Market Regulation Department on forms provided by the Exchange, and the Market Regulation Department may grant qualified exemptions in its sole discretion.

Refer to Rule 559 for requirements concerning the aggregation of positions and allowable exemptions from the specified position limits.

259A01.F. Special Price Fluctuation Limits
At the commencement of each trading day, the contract shall be subject to special price fluctuation limits as set forth in Rule 589 and in the Special Price Fluctuation Limits Table in the Interpretations & Special Notices Section of Chapter 5.

259A01.G. [Reserved]
259A01.H. [Reserved]
259A01.I. Termination of Trading and Expiration Days for Options

1. Monthly Options

Trading in monthly options on monthly South African rand/U.S. dollar futures contracts shall terminate at 9:00 a.m. Central time on the second Friday immediately preceding the third Wednesday of the contract month. If the foregoing date for termination is a scheduled Exchange holiday, trading in monthly options shall terminate on the immediately preceding business day. In the event that the underlying futures market does not open on the scheduled expiration day, the option expiration shall be extended to the next day on which the underlying futures market is open for trading.

2. Weekly Friday Options

Trading in weekly Friday options on the South African rand/U.S. dollar futures contract shall terminate at 9:00 a.m. Central time on those Fridays that are not also the termination of trading of a monthly option as described in the immediately preceding paragraph. If the foregoing date for termination is a scheduled Exchange holiday, trading in weekly Friday options shall terminate on the immediately preceding business day. In the event that the underlying futures market does not open on the scheduled expiration day, the option expiration shall be extended to the next day on which the underlying futures market is open for trading.

259A01.J. Exercise Prices

Regular exercise prices shall be stated in terms of U.S. dollars per South African rand at intervals of $0.00250, e.g., $0.21750, $0.22000, $0.22250, etc.

259A02. LISTING OF EXERCISE PRICES

1. Monthly Options

At the commencement of trading in a contract month for monthly options on South African rand/U.S. dollar futures, the Exchange shall list put and call options at the regular exercise price that is nearest the previous day's settlement price of the underlying futures contract. In addition, the Exchange shall list put and call options at the next eight higher and next eight lower regular exercise prices for options on South African rand/U.S. dollar futures.

When a sale, bid, offer, or settlement price in the underlying futures occurs within half a regular exercise price interval of the eighth highest or eighth lowest existing regular exercise price for options on South African rand/U.S. dollar futures, put and call options at the next higher or next lower regular exercise price shall be listed for trading on the next trading day. New options may be listed for trading up to and including the termination of trading.

The Exchange may modify the provisions governing the establishment of exercise prices as it deems appropriate.

2. Weekly Options

Upon demand, the Exchange shall list any exercise price for the weekly options that is eligible for listing for the nearest monthly option with the same underlying futures contract.

3. Dynamically-Listed Exercise Prices

Upon demand and at the discretion of the Exchange, new out-of-current-range exercise prices at regularly defined intervals may be added for trading on as soon as possible basis.

259A03. EXERCISE AND ASSIGNMENT

In addition to the applicable procedures and requirements of Chapter 7, the following shall apply to the exercise of option contracts on South African rand/U.S. dollar futures. All options on South African rand/U.S. dollar futures are European-style exercise only. Early option exercise prior to the option expiration day is not permitted. Contrary option exercise instructions are also not allowed.

259A03.A. Exercise of Option by Buyer

All in-the-money options are automatically exercised by the Clearing House on the day of expiration for the option. All out-of-the-money options are abandoned by the Clearing House on the day of expiration.
for the option. To determine whether an option is in or out of the money on this day, the Exchange shall calculate the relevant "CME currency fixing price" from GLOBEX-traded underlying futures contracts as follows:

Tier 1 Take the 60-second average of sale (trade) prices, weighted by volume from 8:59:00 to 8:59:59 a.m. on the day of determination of the CME currency fixing price.

Tier 2 If less than three or no sales (trades) occurred during the 60-second interval noted above, take the midpoint of each bid & ask spread where available and average the resulting midpoints over the 60-second interval.

Tier 3 If no sales (trades) and no bid and ask prices occurred during the 60-second interval, then Exchange staff shall derive the CME currency fixing price (as a synthetic futures price) from quote vendor spot rates and appropriate maturity forward points.

An option is in-the-money if the fixing price of the underlying futures contract at termination lies above or is equal to the exercise price in the case of a call, or lies below the exercise price in the case of a put.

259A03.B. Assignment

Exercise notices accepted by the Clearing House shall be assigned through a process of random selection to clearing members with open short positions in the same series. A clearing member to which an exercise notice is assigned shall be notified thereof as soon as practicable after such notice is assigned by the Clearing House, but not later than 45 minutes before the opening of Regular Trading Hours in the underlying futures contract on the following Business Day.

The clearing member assigned an exercise notice shall be assigned a short position in the underlying futures contract if a call is exercised or a long position if a put is exercised. The clearing member representing the option buyer shall be assigned a long position in the underlying futures contract if a call is exercised and a short position if a put is exercised.

All such futures positions shall be assigned at a price equal to the exercise price of the option and shall be marked to market in accordance with Rule 814 on the Trading Day of acceptance by the Clearing House of the exercise notice.
