352A01.D. Underlying Futures Contract
1. Options in the March Quarterly Cycle
   For options that expire in the March quarterly cycle (i.e., March, June, September, and December), the underlying futures contract is the futures contract for the month in which the option expires. For example, the underlying futures contract for an option that expires in March is the March futures contract.

2. Options Not in the March Quarterly Cycle
   For options that expire in months other than those in the March quarterly cycle (i.e., January, February, April, May, July, August, October, and November), the underlying futures contract is the next futures contract in the March quarterly cycle that is nearest the expiration of the option. For example, the underlying futures contract for options that expire in January or February is the March futures contract.

If any of the foregoing exercise prices are within 100 index points of the settlement price of the underlying futures contract, then the Exchange shall list a thirteenth exercise price at the unoccupied level closest to the exercise price within 100 index points of the settlement.

   When a sale, bid, or offer in the underlying futures contract occurs at, or passes through, the sixth highest (or sixth lowest) listed exercise price, put and call option contracts at the next higher (or lower) exercise price shall commence trading on the next Trading Day. New options may be listed for trading up to and including the termination of trading.
Exchange Staff, under delegated authority from the Board may modify the provisions governing the establishment of exercise prices as it deems appropriate.

2. Options Not in the March Quarterly Cycle
