Chapter 371
NY Harbor ULSD vs. Low Sulphur Gasoil Financial Futures

37100. SCOPE OF CHAPTER
The provisions of these rules shall apply to all futures contracts bought or sold on the Exchange for cash settlement based on the Floating Price.

37101. CONTRACT SPECIFICATIONS
The Floating Price for each contract month is equal to the arithmetic average of the NY Harbor ULSD Futures first nearby settlement price minus the first line Low Sulphur Gasoil (ICE) Futures settlement price for each business day during the contract month.

For purposes of determining the Floating Price, the Low Sulphur Gasoil (ICE) Futures first nearby contract month settlement price will be converted each day to US dollars and cents per gallon, rounded to the nearest cent using a conversion factor of 7.45 barrels per metric ton, and 42 gallons per barrel. Except as noted below:

The settlement prices for the first nearby contract month will be used except on the last day of trading for the expiring Low Sulphur Gasoil (ICE) Futures contract when the settlement prices of the second nearby Low Sulphur Gasoil (ICE) Futures contract will be used.

The Floating Price is calculated using the non-common pricing convention. In calculating the spread differential, the monthly average for each component leg of the spread shall be calculated by using all trading days in the month for each component leg of the spread, followed by the calculation of the spread differential between the two averages.

37102.A. Trading Schedule
The hours of trading for this contract shall be determined by the Exchange.
