

CME DataMine

CME Group's new self-service cloud solution allows you to quickly and more efficiently access CME Group data in an integrated, streamlined process with some of the most flexible data delivery points in the marketplace. Get the data you need from more than 450 terabytes of historical market data, some spanning back to the 1970s. With a broad array of data types including Market Depth, End-of-Day, Block Trades, and more, CME DataMine provides the information you need to discover insights and capture market opportunity. Access the new tool today and begin benefitting from:

Flexible data delivery process

- RESTful download API
- Amazon S3 to S3 data transfers
- Data file browser
- SFTP file transfer

Self-service Portal

- Dataset and product search capabilities
- Track and manage orders
- Single-sign-on via CME Group Login
- Get price quotes online, saving you time and steps
- Simplified pricing structure allows for quicker decision making

Integrated invoicing and licensing

- Online license agreements
- Secure payment processing

Available Data Sets:

- Market Depth
- Top-of-Book (BBO)
- Time & Sales
- End-of-Day
- Block Trades

Bitcoin Index Streaming Service

- 24/7 market data access to CME CF Bitcoin Reference Rate (BRR) and CME CF Bitcoin Real Time Index (BRTI) via web service technology.
- The BRTI (Bitcoin Real-time Index) will be published once every second.
- The BRR (Bitcoin Reference Rate) aggregates the trade flow of major bitcoin spot exchanges during a specific calculation window into a once-a-day reference rate of the U.S. dollar price of bitcoin.

CME Market Data Services

More than Data – We Deliver Endless Possibilities

From key pricing on our benchmark future and options products used around the world, to exciting insights driven by non-traditional data sources; to fast, flexible, secure access to live market intelligence; find everything you need to inform every trading decision you make. See how our market data offerings can empower your trading at cmegroup.com/data.

Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade.
