

CME DataMine

CME DataMine is a self-service cloud solution allowing you to quickly and more efficiently access CME Group data in an integrated, streamlined process with some of the most flexible data delivery points in the marketplace. Get the data you need from more than 450 terabytes of historical market data, some spanning back to the 1970s. With a broad array of data types including market depth, end-of-day, block trades, third party datasets and more, CME DataMine provides the information you need to discover insights and capture market opportunity.

Flexible data delivery process

- RESTful download API
- Amazon S3 to S3 data transfers
- Data file browser
- SFTP file transfer

Self-Service portal

- Dataset and product search capabilities
- Track and manage orders
- Single-sign-on via CME Group Login
- Get price quotes online, saving you time and steps
- Simplified pricing structure allows for quicker decision making

Available datasets:

- Third party data
- Market by order (MBO)
- Market depth
- Top-of-book (BBO)
- Time & sales
- End-of-day
- Block trades
- Volume & open interest

CME Group Data Services

Historical data distribution services

Make your data available to thousands of market participants around the globe with historical data distribution via CME DataMine.

Key features:

- Maximize distribution potential with minimal costs and risk
- Market-proven model with international success
- Deliver content using CME Group's advanced technology
- Position your data adjacent to some of the world's most recognized benchmark products

CME CF Cryptocurrency indices streaming service:

Bitcoin and Ether

- 24/7 streaming market data access to CME CF Cryptocurrency indices.
- The BRTI (Bitcoin Real-Time Index) and ETHUSD_RTI (Ether-Dollar Real-Time Index) are real time indices of the US dollar price against the relevant currency and are published once every second.
- The BRR (Bitcoin Reference Rate) and ETHUSD_RR (Ether-Dollar Reference Rate) aggregate the respective trade flows at major global cryptocurrency spot exchanges during a specific calculation window into a once-a-day reference rate of the US dollar price against the relevant cryptocurrency.
- Historical data for BRR and BRTI available since November 2016.
- End-of-day files for the reference rates and real-time indices are also available.

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade. All examples discussed are hypothetical situations, used for explanation purposes only, and should not be considered investment advice or the results of actual market experience.
