

LEADING PRODUCTS

Q3 2015

Built on the heritage of CME, CBOT, NYMEX, COMEX and KCBT, CME Group markets bring together commercial producers and manufacturers, institutional investors, hedge funds, proprietary trading firms and active individual traders from around the globe, trading the widest range of benchmark futures and options contracts listed on any exchange. It creates a deep, diverse pool of liquidity that let's you manage risk, capitalize on every opportunity and realize the maximum possible return on every trade.

Listed below you will find our leading futures and options contracts based on interest rates, equity indexes, energy, foreign exchange (FX), agricultural commodities, and metals.

Futures and options trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade. All references to options refer to options on futures.
