

BrokerTec EU 2025 Customer Disaster Recovery Mock Script

July 19, 2025 - Europe Markets

Registration

Participating members wishing to test with BrokerTec EU must register via [this link](#), so that proper Saturday test permissions may be granted. Each firm that needs to test with the GFE (Global Front End) and CME STP must send their CME Group Login ID and/or API ID they will use, by July 17th, so it can be permissioned for Saturday testing.

Connectivity

Participating members may connect from their production or DR site to BrokerTec EU using their disaster recovery IPs and Port. Participants are encouraged to use their production systems and connectivity configured with CME Group's disaster recovery IPs and Ports, however, firms that wish to test DR to DR connectivity may do so.

BrokerTec Configuration

CME Group's BrokerTec Europe Markets will be running in DR. You must use disaster recovery IPs and Ports, available on the [Client System Wiki](#) to connect to DR markets. You can also get your individual DR details from CME Request Center or reach out to your GAM at GAM@cmegroup.com. CME Group connectivity options (Glink, econnect etc.) will not failover. Customers should plan to use their regular production connectivity solution (configured with DR IPs and Ports) to connect to BrokerTec DR markets.

BrokerTec Global Front End (GFE) Users do not have to reconfigure since GFE was designed to connect to Prod or DR IPs and Ports depending on whichever is available. Be sure to login after CME Group announces that the failover is complete and GFE will connect automatically. More info can be found [here](#).

Range Of Securities Supported

European Government Bonds (EGBs) and EU/UK Repo

A variety of European Government Bonds and EU / UK Repo will be available for Price Entry and Trading.

Customers are encouraged to use Reference Data API or [Reference Data Warehouse](#) to retrieve full information on BrokerTec products on CME Globex. The [GCC Reference Sheet](#) is also available for convenient access to the most critical attributes.

Order Input And Trading

- 1) BrokerTec Europe markets are expected to be in full operation on the test day.
- 2) Participating members can use the BrokerTec GFE to manually enter orders on the EGB / Repo issues if they have provided BrokerTec Europe with their Login ID by July 17.
- 3) Registered participating members may also use their internally developed applications or third- party ISVs to enter orders on the EGB / Repo issues. If testing STP (or dependent on STP connectivity) that STP feed login must be provided to BrokerTec by July 17th, to be permissioned for Saturday testing.
- 4) Because of the risk of inadvertent downstream order and deal capture at the

participating member, BrokerTec suggests that participating members balance their orders equally within an ISIN (BUY versus SELL) on price and quantity.

5) It remains the responsibility of the client to ensure that all orders, trades, and market data are purged from your systems at the conclusion of testing.

Test Date Support

MARKET HOURS

The market will open at 10:00 a.m. Eastern Time (ET) and close at 12:00 p.m. ET on Saturday, July 19, 2025, or sooner should all registered firms complete testing before the scheduled close.

Customer Conference Line

Participants are encouraged to join the customer Google Meet meeting for real-time updates during the exercise.

Customer Mock Bridge Line

Google Meet joining info,

+1 800 438 8616 (U.S.)

+44 20 7623 4747 (Europe)

+65 6532 5010 (Asia)

Contra-Side Orders

On request (via the support number) BrokerTec Market Support will place passive orders or aggress on resting orders to generate trades and STP. The market will be open and uninhibited, such that participating members can trade with one another as in a live market.

Post-Test

At the conclusion of testing a participating member will contact GCC Support and declare that they are finished. GCC Support will delete any remaining orders in the market of that participating member.
