4. Additional Information.....	5
--------------------------------	---

1. Introduction & Overview

The objective of the mock trading session is to ensure iLink customers can connect and test CME Group Market Segment Gateways (MSGW) enhancements, a new CME Globex solution to identify iLink messages which are not completely sent in a single network packet or received out-of-order. This test is an opportunity for customers to participate in a mock trading session in the CME Globex production environment, prior to the MSGW enhancements launch starting on June 21, 2020.

This mock trading session will allow customers to:

- Experience new functionality, [MSGW enhancements](#)
- test new FIX tags to identify the reason for the additional processing and the duration

Please note that only iLink MSGW sessions will be available for testing CME Globex markets during the mock trading sessions.

The CME Global Command Center (GCC) will be staffed to support this session.

There will be a conference bridge line open during the testing.

Conference Bridge Number

US & Canada toll free: 1.800.262.0778

United Kingdom: 0800.528.3819

International toll: [Global call-in numbers](#)

Pass Code

595 354 781

Customers are encouraged to dial into this line for information related to the customer testing session, including CME Group announcement of the beginning of each test phase:

- Connectivity testing
- Unscripted testing

Participants should call the GCC at any time during the testing session with questions, requests or concerns at:

- United States: 1.800.438.8616
- Europe: 44.20.7623.4747
- Asia: 65.6532.5010

2. Timeline

The MSGW enhancements mock trading session will follow the timeline reflected in the tables below. All times are listed in Central time (CT).

4. Additional Information

Drop Copy 4.0 will be available during these mock trading sessions

This mock trading session supports both front-end testing and end-to-end testing through clearing, but there will be no trade capture report messages sent to Clearing Firms.

Detailed information on the MSGW Enhancements is available in the CME Globex Notices at www.cmegroup.com/notices.
