

# Micro Ether Futures

## MICRO-SIZED ETHER, MAJOR POSSIBILITIES

Discover the precision of trading Micro Ether futures (MET), sized at 1/10 of one ether. MET provides another efficient, cost-effective way to manage your exposure to one of largest cryptocurrencies by market capitalization and further optimize your trading strategies. Enjoy the same features of larger Ether futures (ETH) at a fraction of the size and with lower margins, enabling traders of all sizes to manage ether price risk and add diversification.

### Key features

#### FINE-TUNE YOUR ETHER EXPOSURE

Add precision to your strategies and scale positions up or down incrementally using contracts that are 1/500 the size of the larger Ether futures.

#### ENJOY THE PRICE DISCOVERY OF REGULATED FUTURES

Trade in a CFTC-regulated, transparent, and liquid marketplace with time-tested financial safeguards.

#### SAVE ON POTENTIAL MARGIN OFFSETS

Enjoy the efficiency of futures and save on potential margin offsets with [Ether futures](#), [Bitcoin futures and options](#), and [Micro Bitcoin futures](#).

#### EXPLORE MULTIPLE WAYS TO TRADE

Trade electronically through CME Globex, bilaterally via blocks and EFRPs, or using [Basis Trade at Index Close \(BTIC\)](#) transactions.

### About the CME CF Ether-Dollar Reference Rate (ETHUSD\_RR)

Similar to Ether futures, Micro Ether futures settles to the regulated and robust CME CF Ether-Dollar Reference Rate. CME Group's experience and knowledge in bringing the Bitcoin Reference Rate and Real-Time Index to market has enabled us to launch an Ether-Dollar Reference Rate and Real-Time Index.

Ether is based on formidable blockchain technology and the CME CF Ether-Dollar Reference Rate provides a standardized reference rate and spot price index to bring confidence to any trading strategy. Major cryptocurrency exchanges Bitstamp, Coinbase, Gemini, itBit, and Kraken provide the pricing data to bring our dependable and regulated rates to the market.

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
