Getting Started with Micro Henry Hub Natural Gas futures

1. Know the basics
   Before you start trading, get an understanding of how futures work in our Introduction to Futures course, specifically Micro Henry Hub Natural Gas futures.

2. Find a futures broker and open an account
   In order to trade futures, you must find a registered futures broker who will maintain your account and guarantee your trades.

3. Fund your account
   Brokers may require a minimum deposit before you can trade.

4. Select a trading platform
   Brokers may offer different trading platforms with varying cost structures to most efficiently meet your needs.

5. Things to know before trading
   Learn about permissible order types, how to submit an order, fees, and what happens after your order is placed. Find out more.

6. Be a knowledgeable trader
   Inform your trading strategy with innovative tools, including Price Action Alerts and the Strategy Simulator from CME Group.

7. Select the contract month to trade
   Twelve consecutive monthly Micro Henry Hub Natural Gas futures will be listed at one time. Understand futures expiration and settlement.

8. Managing contract expiration
   A futures contract exists until expiration or until an investor closes their position, but traders can roll their position to a later expiry. Discover how to roll.

9. Understand daily profit and loss
   The process of mark-to-market (MTM) is used to determine daily futures profit and loss based on the settlement price of Micro Henry Hub Natural Gas futures.

10. Track trades, positions, and mark-to-market
    Your futures broker will provide you with trade confirmations and statements that show all transactions, charges/credits, and your account balance.
Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
