

Micro E-mini Options

MICRO-SIZED OPTIONS, MAJOR EQUITY BENCHMARKS. NOW FINANCIALLY SETTLED.

Micro E-mini options are available on the S&P 500 and Nasdaq-100 indices. Add the flexibility of daily options to the precision of smaller notional contracts to manage equity index exposure.

MORE PRECISION

Scale S&P 500 and Nasdaq-100 exposure up or down with greater granularity from underlying contracts 1/10 the size of E-mini products.

ADDED VERSATILITY

Express long- or short-term views with Monday through Friday expirations. Build market-neutral, directional and/or multi-leg strategies to seek new opportunities in the equity markets.

FINANCIAL SETTLEMENT

These contracts settle to cash at expiration, removing the need to manage physical delivery and eliminating early assignment risk.

CAPITAL EFFICIENCY

Trade more with less capital using margin and save on potential margin offsets with Micro E-mini futures and other Equity Index futures.

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
