

Single Stock Futures

STOCKS AND FUTURES. BETTER TOGETHER.

Starting this summer, gain exposure to the leading U.S. stocks, all with the power of futures. Single Stock futures are financially settled and offer precise, capital-efficient exposure to over 50 top stocks in benchmark U.S. indices, such as the S&P 500, Nasdaq-100 and Russell 1000.

Why trade Single Stock futures?

Get around-the-clock trading access

Futures trade nearly 24 hours a day – while the stock market sleeps – allowing you to trade on your schedule and respond quickly to market-moving events.

Go short or long with ease

Whether a company’s stock price moves up or down, seamlessly take a long or short position – no stock borrowing fees required.

Expand your trading toolkit

In addition to directional views, execute advanced spread strategies by isolating single stock risk without impacting your broader portfolio exposure.

Trade with less upfront capital

Unlike traditional stocks, futures allow you to trade on margin to control a position up to 6x** larger in value.

Enjoy financially settled contracts

Unlike typical stock options trading, Single Stock futures are financially settled, removing the need to manage physical share delivery for greater operational efficiency.

Explore the differences between Single Stock futures, stocks and stock options

	SINGLE STOCK FUTURES	STOCKS & ETFS	STOCK OPTIONS
TRADING HOURS	23 hours a day (Sunday – Friday).	9:30 a.m. – 4:00 p.m ET (Monday – Friday)	
GOING SHORT	Seamless – without borrowing fees	Often involves borrowing fees and restrictions	Seamless – without borrowing fees
CAPITAL EFFICIENCY	Lower margin	Requires more capital (fully funded or limited margin)	Lower margin
SETTLEMENT	Financially settled; no ownership of shares	Typically involves ownership of shares	

Available across 50+ U.S. stocks

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
