

TO: CME CORE Users

FROM: CME Clearing

DATE: August 30, 2016

ADVISORY #: 16-346

SUBJECT: **CME CORE Now Supporting CME Clearing Europe Listed and OTC Products**

CME Clearing Europe (CMECE) products are now available for indicative margin calculations within CME Group's Clearing Online Risk Engine (CORE). CMECE portfolios can now be uploaded into [CORE's user interface](#) or via CORE's API. Please find further details for utilizing CORE to perform margin analytics on CMECE portfolios [here](#) and instructions on gaining access to CORE below.

For more information about CME Europe products and membership, please see here:
<http://www.cmegroup.com/europe/clearing-europe.html>

About CME Group's European Clearing House

Launched in May 2011, CME Clearing Europe (CMECE) is a London-based clearing house which operates in an English law and European regulatory environment. We provide multi-asset class clearing services covering OTC transactions and exchange-traded derivatives on CME Europe, our new London-based derivatives exchange.

As a central counterparty clearing house, our business centres on safeguarding the interests of our customers and the integrity of the markets we serve. To achieve this we act as the central counterparty to every trade we clear and stand behind the performance of every transaction.

Our service combines operational flexibility with a transparent risk management and an account structure that offers a range of protection choices for clients should their clearing broker fail. Credit risk is virtually eliminated and central clearing offers efficiencies in the use of capital.

Gaining Access to CORE:

- 1) Go to the CME CORE login screen: <https://cmecore.cmegroup.com/>
- 2) Log in or click on the "Need to Register" link and provide the required information.
- 3) Receive your CME Group Login ID and log back in to CORE. Please reach to EASE.AtYourService@cmegroup.com with any questions about creating a SMART Click ID.

Please contact the CME CORE group at cme.core@cmegroup.com with any questions.
