

TO: CME Optimizer Users

FROM: CME Clearing

DATE: September 1, 2016

ADVISORY #: 16-360

SUBJECT: **Update: New Version of CME Optimizer (9.0) NOW Available for Download in CORE: Mandatory Update Required in Production by October 3, 2016**

A new version of CME Optimizer (version 9.0) is now available to download for testing from <https://cmecore.cmegroup.com/core/>. All users must upgrade to the new version by October 3, 2016 in order to properly process existing market data files. Because Optimizer 9.0 is backwards compatible, upgrading before 10/3/16 is encouraged.

Please test using New Release environment market data files produced tonight, 9/1/16, and subsequent dates. Older market data files will not include new products and currencies.

Please see advisory [16-338](#) for additional details about the new build.

Please reach out to cme.core@cmegroup.com with any questions.
