SUBJECT: CME SPAN® Software Update Now Available (Version 4.5.610)

PC-SPAN® and SPAN® Risk Manager version 4.5 build 610 are now available for download in the CME CORE download center. This is now the active build; support for older builds will cease in the coming months.
Please see installation instructions below.

SPAN 610 Enhancements
SPAN 610:
- Updates minimum system requirements.
  - Minimum operating system requirement is now Windows OS **64 bit** (was 32 bit).
  - Minimum version of Microsoft Visual Studio is Visual C++ 2015 Runtime Libraries x64 (was Visual C++ 2013).
  - A full list of updated system requirements is here.
- Provides minor updates to the message logging process.
- Fixes a netting issue for modified and regular split allocation when processing margin requirements for naked gross positions.
  - Some omnibus portfolios which have positions in split allocation-eligible products are impacted by this issue.
- Addresses a Short Option Minimum charge rounding issue with minimal portfolio impact.
- Fixes leg aggregation issues for inter-commodity scan-based spreads when multiple currencies, short option minimum or spot charge are present.

A full list of all enhancements made can be found in release notes here.
