

## Special Executive Report

---

**DATE:** July 29, 2024

**SER#:** 9350

**SUBJECT:** Amendments to the Block Trade Minimum Quantity Threshold and Spread Combinations for Certain CME and CBOT Agricultural Futures and Options Contracts.

Effective Sunday, August 25, 2024, for trade date Monday, August 26, 2024, and pending all relevant CFTC regulatory review periods, Chicago Mercantile Exchange Inc. ("CME") and The Board of Trade of the City of Chicago, Inc. ("CBOT") (collectively, the "Exchanges") will amend the block trade minimum quantity threshold and spread combinations for certain agricultural futures and options on futures contracts (the "Contracts") as noted in Exhibit A below (collectively, the "Rule Amendments").

Currently the minimum block threshold of the Contracts varies during Asian Trading Hours ("ATH"), European Trading Hours ("ETH"), and Regular Trading Hours ("RTH"). In addition, currently each leg of spread combinations of the Contracts must meet the designated minimum quantity threshold.

Pursuant to the Rule Amendments, the Exchanges shall amend the Block Trade table (the "Table") to align the block trade minimum quantity threshold for all trading hours; and amend the block trade minimum quantity threshold for certain spread combinations. Specifically, spread combinations of futures will be allowed to be executed as block trades provided that the sum of the legs of the spread meet the block trade minimum threshold for the contract (intra-commodity spreads), or the sum of the legs of the spread meet the block trade minimum threshold for the contract with the higher block trade minimum threshold (inter-commodity spreads). Exhibit A provides amendments to the minimum block quantity threshold for the Contracts. Exhibit B below provides amendments to the Table.

The Rule Amendments are being implemented to align such levels with other contracts with similar liquidity levels and are intended to broaden the scope of potential market participants without negatively impacting participation in the Exchange's central limit order book ("CLOB") markets.

It should be noted that the related block trading reporting window is either 5 or 15 minutes for all trading hours and shall remain unchanged. The existing Table may be viewed [HERE](#).

## Exhibit B

### Amendments to the Block Trade Table Regarding Spread Combinations (additions underscored; deletions ~~struck through~~)

	CME and CBOT Products	NYMEX and COMEX Products
<u>Intra-Commodity Futures</u> Spreads and <u>Futures</u> Combinations	<p>The <i>sum</i> of the quantities of the legs of the transaction must meet the minimum block quantity threshold.</p> <p>* Exceptions apply in:  <del>i) Agricultural Futures (excluding Dairy Futures);</del>            ii) Foreign Exchange Futures;  <del>iii) U.S. Treasury Futures;</del>  <del>iv) S&amp;P GSCI, S&amp;P GSCI ER, and Bloomberg Roll Select Commodity Index Futures; and</del>            v) BTIC Futures Spreads.</p>	<p>The <i>sum</i> of the quantities of the legs of the transaction must meet the minimum block quantity threshold</p>
<u>Intra-Commodity Options</u> Spreads and <u>Options</u> Combinations	<p><i>Each leg of the spread</i> must meet the designated minimum quantity threshold.</p> <p>** Exceptions apply in:            i) Foreign Exchange Options; and;            ii) Dairy Options.</p>	<p>The <i>sum</i> of the quantities of the legs of the transaction must meet the minimum block quantity threshold</p>
<u>Inter-Commodity Futures</u> Spreads and <u>Futures</u> Combinations	<p><i>Each leg of the spread</i> must meet the <i>larger</i> of the threshold requirements for the underlying products.</p> <p>*** Exceptions apply in:            i) Short Term Interest Rate Futures;            ii) U.S. Treasury Futures;            iii) Interest Rate Swap Futures;            iv) U.S. Treasury Futures and Forward-Starting SOFR Reference Interest Rate Swaps ("Treasury Invoice Spreads")            v) <u>Dairy Agricultural</u> Futures; and            vi) <del>Select Grain Futures.</del></p>	<p>The <i>sum</i> of the quantities of the legs of the transaction must meet the <i>larger</i> of the threshold requirements for the underlying products</p>
<u>Inter-Commodity Options</u> Spreads and <u>Options</u> Combinations	<p><i>Each leg of the spread</i> must meet the <i>larger</i> of the threshold requirements for the underlying products.</p> <p>**** Exceptions apply in:            i) Short Term Interest Rate Options;            ii) Dairy Options; and            iii) Select Grain Options.</p>	<p>The <i>sum</i> of the quantities of the legs of the transaction must meet the <i>larger</i> of the threshold requirements for the underlying products</p>
Options/Futures Spreads	<p>The options component of the spread must meet the minimum quantity threshold for the outright option or option combination and the quantity of futures executed must be consistent with the delta of the options component of the spread.</p> <p>***** <b>An exception applies in Weather options/futures spreads.</b></p>	<p>The options component of the spread must meet the minimum quantity threshold for the outright option or option combination and the quantity of futures executed must be consistent with the delta of the options component of the spread.</p>

CME and CBOT Products	NYMEX and COMEX Products
Except as specified below, CME and CBOT block trade spreads and combinations are subject to the reporting requirements of the outright products as noted in this table.	All spreads and combinations in block-eligible NYMEX and COMEX futures and options products must be submitted within 15 minutes of execution.
Any inter-commodity block spread or combination trade that includes one or more IRS futures legs and one or more legs subject to a 5-minute submission requirement must be submitted within 5 minutes of execution.	
Any inter-commodity futures block spread or combination trade in agricultural products that includes one or more legs subject to a 5-minute submission requirement and one or more legs subject to a 15-minute submission requirement must be submitted within 15 minutes of execution.	

i) Intra-Commodity Agricultural Futures Spreads and Futures Combinations

~~For intra-commodity CME and CBOT Agricultural futures spreads and futures combinations in all products except Dairy products, each leg of the transaction must meet the designated minimum quantity threshold.~~

For Dairy **Agricultural** intra-commodity futures spreads and futures combinations, the sum of the quantities of the legs of the transaction must meet the minimum quantity threshold.

ii) Intra-Commodity Foreign Exchange Futures Spreads

For intra-commodity Foreign Exchange futures spreads, where the legs of the spread have different minimum quantity thresholds, the sum of the quantities of the legs of the transaction must meet the larger of the threshold requirements.

iii) Intra-Commodity U.S. Treasury Futures Spreads

*Intra-commodity calendar spread block trades are prohibited in CBOT U.S. Treasury futures.* Parties may not execute contingent block trades in outright contracts to circumvent the prohibition on the execution of block trades in intra-commodity calendar spreads. Additionally, tandem spreads (a trade combining calendar spreads in two different Treasury futures) may not be executed as block trades.

iv) Intra-Commodity S&P GSCI, S&P GSCI ER and Bloomberg Roll Select Commodity Index Futures Spreads

For the above-referenced futures products, the block trade minimum is 50 contracts for each leg of the spread or combination. For example, the minimum quantity for an S&P GSCI calendar spread would require 50 contracts in each leg of the spread for a total of 100 contracts while a Bloomberg Roll Select Commodity Index futures butterfly would require a minimum volume of 200 contracts (50 contracts in each of the four legs of the butterfly).

v) Intra-Commodity Basis Trade at Index Close (BTIC) Futures Spreads

For intra-commodity BTIC block futures spreads, in BTIC block products eligible for intra-commodity spreads, each leg must meet the applicable block trade minimum threshold for the BTIC product.

**\*\* Exception for Intra-Commodity Options Spreads and Options Combinations**

i) Intra-Commodity Foreign Exchange Options

For intra-commodity Foreign Exchange options spreads and options combinations, the sum of the quantities of the legs of the transaction must meet the minimum block quantity threshold.

ii) Intra-Commodity Dairy Options

For intra-commodity Dairy options spreads and options combinations, the sum of the quantities of the legs of the transaction must meet the minimum block quantity threshold.

**\*\*\* Exceptions for Inter-Commodity Futures Spreads and Futures Combinations**

i) Short Term Interest Rate Futures

In Short Term Interest Rate futures, inter-commodity futures spreads may be executed as block trades provided that each leg of the spread meets the smaller of the threshold requirements for the underlying products. For example, minimum quantity thresholds for block trading outright during RTH are 500 contracts for One-Month SOFR futures and 2,000 contracts for 30-Day Federal Funds futures. Therefore, a block trade in the One-Month SOFR/30-Day Federal Funds futures spread can be executed provided that the size of each leg is at least 500 contracts, the block trade minimum threshold level applicable to the One-Month SOFR futures leg.

ii) U.S. Treasury Futures

In U.S. Treasury futures, inter-commodity futures spreads may be executed as block trades provided each leg of the spread meets the minimum threshold requirement for the respective underlying products. For example, the minimum quantity thresholds for Long-Term Treasury Notes and Treasury Bonds during RTH are 5,000 and 3,000 contracts, respectively. Therefore, a block trade in the NOB spread (Long-Term Treasury Note/Treasury Bond spread) can be executed only if the minimum quantity of the 10-Year Note leg of the spread is at least 5,000 contracts and the minimum quantity of the Treasury Bond leg of the spread is at least 3,000 contracts.

iii) Interest Rate Swap ("IRS") Futures

Inter-commodity IRS futures spreads or combinations (e.g., 2-Year IRS v. 10-Year IRS) may be executed as block trades provided the sum of the legs of the spread meets the larger of the threshold requirements for the underlying products. For example, the minimum block trade thresholds for 2-Year IRS and 10-Year IRS are 3,000 and 1,000 contracts, respectively. Thus, a spread between these two contracts may be executed as a block trade if the sum of the quantities of the legs is at least 3,000 contracts.

Inter-commodity futures spreads or combinations excluding those composed only of IRS futures (e.g., Ultra 10-Year Treasury Notes vs. 10-Year IRS futures) may be executed as block trades provided each leg of the spread meets the minimum threshold requirement for the respective underlying products. For example, the minimum block trade thresholds for Ultra 10-Year Treasury Note futures and 10-Year IRS futures during RTH are 3,500 contracts and 1,000 contracts, respectively. A spread between these two contracts can be

executed as a block trade, therefore, only if the quantity of the Ultra 10-Year Treasury Note leg is at least 3,500 contracts and the quantity of the 10-Year IRS futures leg is at least 1,000 contracts.

iv) U.S. Treasury Futures and Forward-Starting SOFR Reference Interest Rate Swaps (“Treasury Invoice Spreads”)

Contingent trades in Treasury Invoice Spreads where the block trade minimum thresholds for block trades in outright CBOT Treasury futures are circumvented are prohibited.

v) Dairy-Agricultural Futures

Inter-commodity futures spreads and futures combinations in Dairy-Agricultural futures products may be executed as block trades provided the sum of the quantities of the legs of the transaction meets the larger of the threshold requirements for the underlying products.

vi) Select Grain Futures

Inter-commodity spreads in CBOT FOB Santos Soybeans Financially Settled (Platts) futures and CBOT Soybean Futures may be executed as block trades in a 1:1 ratio provided each leg of the spread is at least 20 contracts.

~~Inter-commodity futures spreads in the following CBOT grain products may be executed as block trades provided each leg of the spread meets the minimum quantity ratio (or any multiple thereof) as shown in the table below:~~

Leg 1	Minimum Quantity	Leg 2	Minimum Quantity
<del>Black Sea Wheat Financially Settled (Platts) Futures (BWF)</del>	<del>100</del>	<del>KC HRW Wheat Futures (KW)</del>	<del>37</del>
<del>Black Sea Wheat Financially Settled (Platts) Futures (BWF)</del>	<del>100</del>	<del>Chicago SRW Wheat Futures (W)</del>	<del>37</del>
<del>Australian Wheat FOB (Platts) Futures (AUW)</del>	<del>100</del>	<del>KC HRW Wheat Futures (KW)</del>	<del>37</del>
<del>Australian Wheat FOB (Platts) Futures (AUW)</del>	<del>100</del>	<del>Chicago SRW Wheat Futures (W)</del>	<del>37</del>
<del>Canadian Western Red Spring Wheat FOB Vancouver Financially Settled (Platts) Futures (CWR)</del>	<del>100</del>	<del>KC HRW Wheat Futures (KW)</del>	<del>37</del>
<del>Canadian Western Red Spring Wheat FOB Vancouver Financially Settled (Platts) Futures (CWR)</del>	<del>100</del>	<del>Chicago Wheat Futures (W)</del>	<del>37</del>

~~Inter-commodity futures spreads in the following CBOT grain products may be executed as block trades provided each leg of the spread meets the minimum quantity as shown in the table below, or in any 5 (financially settled):2 (physically delivered) ratio above the minimum quantity:~~

Leg 1	Minimum Quantity	Leg 2	Minimum Quantity
Black Sea Corn Financially Settled (Platts) Futures (BCF)	100	Corn Futures (C)	40
Ukrainian Wheat (Platts) Futures (UWF)	100	KC HRW Wheat Futures (KW)	40
Ukrainian Wheat (Platts) Futures (UWF)	100	Chicago SRW Wheat Futures (W)	40

**\*\*\*\* Exception for Inter-Commodity Options Spreads and Options Combinations**

i) Short Term Interest Rates Options

In options on Short Term Interest Rate futures, inter-commodity options spreads and options combinations may be executed as block trades provided that each leg of the spread or combination meets the smaller of the threshold requirements for the underlying products. For example, minimum quantity thresholds for block trading outright during RTH are 5,000 contracts for options on Three-Month SOFR futures and 1,500 contracts for options on 30-Day Federal Funds futures. Therefore, a block trade in a Three-Month SOFR options/30-Day Federal Funds options spread can be executed provided that the size of each leg is at least 1,500 contracts, the block trade minimum threshold level applicable to the 30-Day Federal Funds options leg.

ii) Dairy Options

In options on Dairy futures, inter-commodity options spreads and options combinations may be executed as block trades provided that the sum of the legs of the spread or combination meets the larger of the threshold requirements for the underlying products.

iii) Select Grain Options

Inter-commodity options spreads in the following CBOT grain products may be executed as block trades provided each leg of the spread meets the minimum quantity as shown in the table below, or in any 5 (financially settled):2 (physically delivered) ratio above the minimum quantity:

Leg 1	Minimum Quantity	Leg 2	Minimum Quantity
Black Sea Wheat Financially Settled (Platts) Options (BWO)	100	KC HRW Wheat Options (KW)	40
Black Sea Wheat Financially Settled (Platts) Options (BWO)	100	Chicago SRW Wheat Options (W)	40
Black Sea Corn Financially Settled (Platts) Options (BSO)	100	Corn Options (C)	40
Options on Ukrainian Wheat (Platts) Futures (UWO)	100	KC HRW Wheat Options (KW)	40

Options on Ukrainian Wheat (Platts) Futures (UWO)	100	Chicago SRW Wheat Options (W)	40
---	-----	-------------------------------	----

iv) Inter-Commodity Foreign Exchange Options

For inter-commodity Foreign Exchange options spreads and options combinations, the sum of the quantities of the legs of the transaction must meet larger of the threshold requirements for the underlying products.

**\*\*\*\*\* Exception for Options/Futures Spreads**

Weather

An exception applies to Weather options/futures spreads, where the legs of the spread may be summed to meet the 20-contract minimum threshold.
