(Refer to Rule 713., Delivery Procedures.)

14N08. PREMIUM CHARGES

(FOR ALL CONTRACT MONTHS UP TO AND THROUGH THE CONCLUSION OF THE DECEMBER 2026 DELIVERY PERIOD (DECEMBER 16, 2026))

To be valid for delivery on futures contracts, all certificates covering mini-sized wheat under obligation for shipment must indicate the applicable premium charge. No certificate shall be valid for delivery on futures contracts unless the premium charges on such wheat shall have been paid up to and including the 18th calendar day of the preceding month, and such payment is endorsed on the certificate. Unpaid accumulated premium charges at the posted rate applicable to the facility shall be allowed and credited to the buyer by the seller up to and including date of delivery.

The maximum premium charges on mini-sized wheat shall be determined prior to the nearby contract delivery period. The Exchange shall measure the nearby spread relative to financial full carry each business day from the 19th calendar day of the delivery month of the contract that expires prior to the nearby contract until the last Friday which precedes by at least two business days the last business day of the month preceding the nearby contract delivery month. For example, for a September expiration, the Exchange would measure the September – December spread relative to financial full carry each business day from July 19 until the last Friday in August which precedes by at least two business days the last business day in August. Financial full carry will be determined by the following formula:

$$N * \left[\left(\frac{i}{360} \right) * FP + P \right]$$

Where:

N = Number of calendar days from the first delivery day in the nearby contract to the first delivery day in the contract that follows the nearby contract

i = CME Group 3-Month Term SOFR rate + 221.25 basis points

FP = Settlement price for the nearby futures contract

P = Current daily premium charge

The percentage of the nearby spread to financial full carry is calculated each business day during the calculation period and a running average of each of these daily values is calculated. At the end of the calculation period (the last Friday which precedes by at least two business days the last business day of the month preceding the nearby contract delivery month), should the running average carry be 80 percent of financial full carry or greater, then the maximum daily premium charge shall increase 10/100's of one cent per bushel on the 19th calendar day of the nearby contract delivery month. Should the running average carry be 50 percent of financial full carry or less, then the maximum daily premium charge shall decrease 10/100's of one cent per bushel on the 19th calendar day of the nearby contract delivery month.

The Exchange may adjust how the observed nearby spread is measured relative to financial full carry should pending contract changes exist that have the potential to affect the normal nearby spread relationship. Any adjustments to how the observed spread is measured will attempt to remove the potential effects caused by the pending contract change. Any adjustments in how the nearby spread is measured will be communicated to market participants through a Special Executive Report or Exchange Advisory Notice prior to the beginning of the measurement period.

Premium charges shall not be reduced below 16.5/100's of one cent per bushel per day.
