#### **1423101. SCOPE OF CHAPTER**

The provisions of these rules shall apply to all contracts bought or sold on the Exchange for cash settlement based on the Floating Price.

#### **1423102. CONTRACT SPECIFICATIONS**

The Floating Price for each contract month is equal to the arithmetic average of the "\$/mt" quotations from the Platts Asia-Pacific Marketscan under the heading "Marine fuel" for "0.5% FOB Singapore cargo" minus the arithmetic average of the high and low quotations from the Platts Asia-Pacific Marketscan for "Singapore 380cst HSFO (waterborne cargo)" for each business day during the contract month.

The Floating Price is calculated using the non-common pricing convention. In calculating the spread differential, the monthly average for each component leg of the spread shall be calculated by using all trading days in the month for each component leg of the spread, followed by the calculation of the spread differential between the two averages.
