

## Special Executive Report

S-5726

April 21, 2011

### **LISTING CYCLE FOR THE CBOT SOYBEAN CRUSH COMPLEX**

**Effective with trade date 5/16/11, the listing cycle for synthetic Soybean Crush futures (BCX) and Soybean Crush futures on Globex (SOM) will be expanded to include the first 11 contract expirations and the listing cycle for Soybean Board Crush Spread options (BC calls / BP puts) will be expanded to include the first 10 contract expirations.**

The listing cycle for Soybean Crush products is at the discretion of the Exchange. Under current arrangements, the Exchange generally lists the first eight expirations for the synthetic Soybean Crush future and the Soybean Crush future on Globex and the first seven expirations for the Soybean Board Crush Spread option. Due to customer demand, the listing cycle will be expanded by three expirations on 5/16/11 so that synthetic and Globex Soybean Crush futures will always have the first 11 contract expirations and Soybean Board Crush Spread options the first 10 contract expirations. The Exchange will continue to consider requests for early listings on a case-by-case basis.
