## Mock Trading Overview

---

The objective of these mock trading sessions is to ensure customers have sufficient opportunity to access, trade, and clear all electronically listed products for the Chicago Board of Trade (CBOT), the Kansas City Board of Trade (KCBT), and the Minneapolis Grain Exchange (MGEX).

These mock trading session dates are:

- December 1, 2007 - Saturday
- December 15, 2007 – Saturday
- December 22, 2007 - Saturday
- January 5, 2008 - Saturday
- January 12, 2008 - Saturday
- January 26, 2008 - Saturday

## Clearing Mapping Required

**Please Note:** A prerequisite to participate in mock trading is that all clearing number mapping has been completed; otherwise orders will be rejected. Please confirm with your clearing firm that this is complete. Clearing firms should contact their Globex Account Manager at 312 634-8700 or via email at [globexaccountmanagement@cme.com](mailto:globexaccountmanagement@cme.com) to complete the set up prior to mock trading.

## Mock Trading Session Contacts

---

There will be a general conference bridge line open during the mock trading sessions and all customers are requested to dial in to receive important information throughout the session.

- Mock Trading Session conference bridge number: **1-866-548-4703**
- Passcode: **584529**

Below are additional CME Group contact numbers for the mock trading sessions.

Mock Trading Session Topic	Telephone Contact

These futures markets open at regular times starting Sunday night.</li> </ul>

### \*Session 3 - January 5

The January 5 session will incorporate an additional rollback contingency test to ensure client systems can effectively transition from CME Globex to the e-cbot platform in the unlikely event a contingency scenario is invoked. This test will involve halting the following Dow products on CME Globex:

- mini-Sized Dow (\$5) futures and options
- DJIA (\$10) Dow futures and options
- BIG Dow (\$25) futures

When the market halts, CME Group will notify customers of the event according to standard messaging for Market Halts (see [www.cme.com/trading/get/gccAlert.html](http://www.cme.com/trading/get/gccAlert.html)). Customers wishing to receive GCC Notifications should contact their CME Globex Firm Administrator to become a CME Globex Registered Contact.

Customers can then reconfigure their systems to the e-cbot Simulation platform and resume trading upon re-open of Dow markets according to the following timetable:

Contingency Plan Test Schedule	Time (CT)
Markets halted on CME Globex for all Dow products	10:30
SPI and Envoy messages sent to users	10:30
Pre-open on e-cbot SIM	10:45
Products open on e-cbot SIM	11:00
Mock trading concludes	11:30

## Mock Trading Session Scenarios

Please see the Appendix for the formal mock trading session scripts. The mock trading scripts are structured so that there is representative trading for all different price types within each product sector for both futures and options (including spreads) across CBOT, KCBT, and MGEX.

Customers are encouraged to conduct independent test scenarios and may call the GCC to serve as a proxy for counter-party order actions in specific markets. In addition, customers are encouraged to use the mock trading session weekends to contact the GCC to bust trades, cancel orders on their behalf, and determine order/trade status. Please note that all CME Globex products will be available for trading during each mock trading session. CME Group will also simulate a trading platform fallback from CME Globex to e-cbot SIM during the January 5 mock trading session.

The table below outlines which CBOT product groups will be available per platform for each of the Saturday mock trading sessions to allow front end systems to test simultaneous connectivity to both platforms.

	Dec. 1	Dec. 15	Dec. 22	Jan. 5	Jan. 12	Jan. 26
<b>* Globex Mock Trade products</b>	- Agriculture - Equity	- Agriculture - Equity - Financial	- Agriculture - Equity - Financial	- Agriculture - Equity - Financial	- Agriculture - Equity - Financial - Legacy CME Markets	- Agriculture - Equity - Financial
<b>** e-cbot Simulation products</b>	- Financial - Metals	- Metals	- Not available	- Metals	- Metals	- Metals

\* Globex Production environment open for mock trading session for specified product groups

\*\* e-cbot Simulation environment open for user connectivity for specified product groups

## Mock Trading Session Reporting

---

CME Group welcomes user feedback after each mock trading session and will use that to determine if any changes need to be applied for subsequent sessions. Customers are encouraged to use the following e-mail address to provide feedback about any mock trading session: [globexaccountmanagement@cme.com](mailto:globexaccountmanagement@cme.com).

## Market Data & Product Code Information

---

Please note that prior to mock trading, all systems should be configured to listen to the new CBOT market data channels on the MDP as follows:

**RLC:** 111-121

**ITC2:** 100, 208-213

### Market Data Platform Channel Definitions

Please see Section 5 of the *CBOT Client System Impact Document* for CBOT, KCBT and MGEX Product Channel Definitions and IP addresses at: [www.cme.com/cbotimpact](http://www.cme.com/cbotimpact).

### FIX/FAST Requirement

CME Group will only provide FIX/FAST production IP addresses and ports to customers who have certified their systems on FIX/FAST or are using a certified FIX/FAST application. Please contact your Globex Account Manager for more information.

### Product Code Changes

In addition, there are changes in product codes for five products listed in Appendix F of the Client Impact document. The affected products are: Ethanol Futures, mini-Sized Soybean Futures, Dow Jones U.S. Real Estate Index Futures, Dow Jones AIG Commodity Index Excess Return Futures, and 30-Year U.S. Interest Rate Swap Futures.

### Product Symbol Information

Please see Appendix F of the *CBOT Client System Impact Document* for CBOT product symbol and code information at: [www.cme.com/cbotimpact](http://www.cme.com/cbotimpact).

**Note:** The CBOT ITC2 codes for the products listed below are in current conflict with CME ITC2 codes and will not be available for any of the mock trading sessions. These products can be tested in the New Release environment and the conflicting codes will be changed in production when these products migrate during their designated January launch weekends.

- Ethanol futures and future spreads
- mini-Sized Soybean futures and futures spreads
- Dow Jones AIG Commodity Index Excess Return Index futures and futures spreads
- Dow Jones U.S. Real Estate Index futures and futures spreads
- 30-Year Interest Rate Swap futures and futures spreads

\* The ITC2 option codes for the futures products referenced above will not be changing as the products migrate from e-cbot to CME Globex nor will they be available for any of the mock trading sessions since the options products reference the futures as part of the message structure. These options and options spread products are available in the New Release environment for user testing.
