

## CME® Market Data Operations

**Date:** July 12, 2007  
**Notice #:** Q2007 - 180  
**Subject:** Instrument Creation (MO) Message Enhancements –  
 Attention RLC Message Users – Effective Sunday, July  
 22, 2007

Effective Sunday, **July 22, 2007**, CME® is launching the following enhancements to the Instrument Creation (MO (em-oh)) RLC market data message in the **New Release environment**. These new fields provide important instrument information, such as the fractional versus decimal price display, originating exchange and explicit Cabinet price for options. These new fields are scheduled to launch in the production environment in the first quarter 2008.

Complete specifications for the MO market data message are available in the [CME Market Data Platform RLC Message Specifications](#).

### New Fields in MO Messages

Position	Title	Length	Description
798	Fractional Pricing Flag	1	Indicates if instrument should display with decimal or fractional price 0=Decimal display 1=Fractional Display
900-903	Exchange Code	4	ISO Standard Exchange identifier XCME=CME XNYM=NYMEX and COMEX XOCH=OneChicago
904-923	Cabinet Price	20	19byte price field defines cabinet price for options. First byte is the decimal locator. This field is populated only for options.

**Please note:** New Release, Certification and Production are completely independent environments. Product listings and ISIN codes, as found in the CME Globex Internal ID field of the MO message, may be different in each environment. CME recommends that customers use the CME Market Data Platform channels specific to each environment, as defined in the channel definitions:

- [New Release Channel Definitions](#)
- [Certification Channel Definitions](#)
- [Production Channel Definitions](#)
