

Market Data Operations

Date: August 15, 2007
Notice #: Q2007-206
Subject: S&P Real-Time Indexes – Recommended Display Formats

In order to maintain consistency across vendors, S&P recommends display formats for the various real-time indexes transmitted over the CME Market Data Platform (MDP). The following indexes are currently being transmitted over the MDP:

<u>Index Name</u>	<u>CME Ticker Code</u>	<u>S&P Recommended Code</u>
S&P 500 Shariah Index	SHX	SPSHX
S&P Europe 350 Shariah	SHE	SPSHE
S&P Japan 500 Shariah	SHJ	SPSHJ

In the future, additional Shariah Indexes may be added; S&P will recommend the display codes should all begin with the base code “SPSH”.
