

## Advisory Notice

Clearing House

#09-243

TO: NYMEX Clearing Firms  
Service Bureaus / System Solutions providers

FROM: CME Clearing

DATE: June 8, 2009

SUBJECT: **NYMEX Clearing Integration Firms Testing Plans for Cycle 2 on June 9 and June 11, 2009.**

**This advisory contains important information for firms testing NYMEX, COMEX and DME on CME Clearing during Cycle 2 scheduled for Tuesday, June 9, 2009 and Thursday, June 11, 2009.**

### Testing Procedures for Tuesday and Thursday:

- **On Tuesday**, CME Clearing will inject all prior day Globex for **All NYMEX, COMEX and DME** futures and options trades executed in production from prior day. Trades will be posted with trade date **June 9, 2009** in Front End Clearing FEC New Release environment.
- **On Thursday**, CME Clearing will inject all prior day Globex **NYMEX, COMEX and DME** futures and options. Trades will be posted with trade date **June 11, 2009** in FEC.
- Clearing FIXML confirms will be sent to firms New Release MQM queues that starts with CDCS...and sent to their books.
- **ClearPort clearing trades will be injected for all NYMEX, COMEX and DME products for all firms** that were executed in prior day production. Trades will be injected on both Tuesday and Thursday and will use June 9 and June 11 trade dates respectively.
- CME will enter Pit trade on behalf of floor brokers and clerks. A test script will be available on CME FTP site: <ftp://ftp.cmegroup.com/span/data/cme/test/scripts>. NYMEX-cycle2.pdf
- **Firms who wish to receive floor trades should contact [ccs@cmegroup.com](mailto:ccs@cmegroup.com) to request floor trades entered for them and or allocated to other firms. CME will use account number NYMEXTEST for all Pit trades and enter prices from prior day settlements.**
- FIXML clearing confirmations messages will be sent to firms at approximately 9:00 a.m. CST on both test dates.

### Testing Requirements: Firms are encouraged to use the full functionality of:

- Front End Clearing FEC, modify non critical trade data like account, origin and CTI.
- Mark trades for giveup and use the Allocate-Claim System.
- Mark trades for averaging and utilize the Average Pricing System (APS)
- Submit PCS by 4:00 p.m. on both test dates. Testing file name: **TPCS.CMF\_123.XML**
- Retrieve Trade Register Files and Clearing Reports on Wednesday and Friday, June 10<sup>th</sup> and June 12<sup>th</sup> and do point balancing. Register testing file name: **NEREL-FIXML-123\_EOD.xml**, where 123 is the firm clearing id.
- Submit Large Trader File on Wednesday and Friday morning. Testing file name, where 123 is the firm clearing id: **TFTP.F123RPS.NYMEX.DATA**.

- Check final positions in New Release Positions application, adjust positions, exercise options and submit special instructions.

#### Testing Applications Reports Naming Convention:

- All testing will be conducted in Clearing New Release environment via CME Portal: <http://connectcert.cme.com> Log in to Front End Clearing FEC New Release.
- Positions can be viewed in Positions NEW RELEASE. This is a new application for NYMEX positions.
- Files can be retrieved from the regular FTP server Outgoing folder that currently used for production.
- Firms can use Combined SPAN file available in public FTP site: <ftp.cmegroup.com/pub/span/data/cme/test>. File name: **cme.test.20090522.s.pa2.zip**.
- All test reports are available in Document Direct application production environment. This is the list of clearing reports that will be available:
