Back Office Managers  
Service Providers

FROM: CME Clearing

ADVISORY #:

SUBJECT: **REMINDER: Cross-Exchange Allocations (MOS) on FECPlus  
Utilizing FIXML 5.0 Scheduled for February 27, 2012**

DATE: February 8, 2012

As a reminder, the Production launch date for Cross-Exchange Allocations (MOS) on FECPlus, utilizing the FPL-compliant FIXML 5.0 API, is scheduled for **Monday, February 27, 2012**.

This new version of the FIXML API allows two-way API messaging for taking actions on allocations within FECPlus. In order to assist our customers in preparing for this change, we have created a recommended MOS/FEC+ test script. The test script can be accessed via this link: [http://www.cmegroup.com/tools-information/lookups/advisories/clearing/files/MOSFECPlus\\_Test\\_Script.pdf](http://www.cmegroup.com/tools-information/lookups/advisories/clearing/files/MOSFECPlus_Test_Script.pdf)

We recommend that, at the minimum, you are able to process the included scenarios, as well as your own normal business scenarios.

If you have any questions or require further information please contact CME Clearing at 312-207-2525 or [ccs@cmegroup.com](mailto:ccs@cmegroup.com).
