

Wet Freight Futures and Options

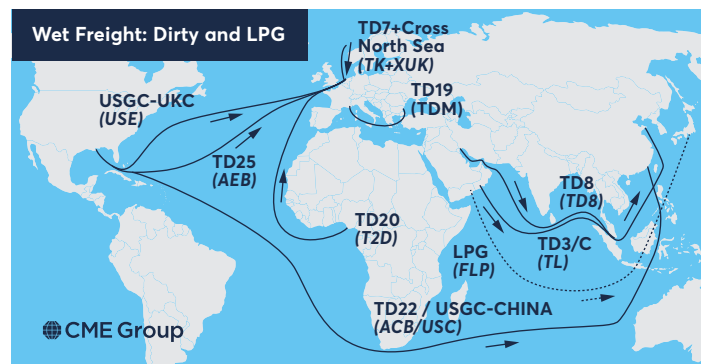

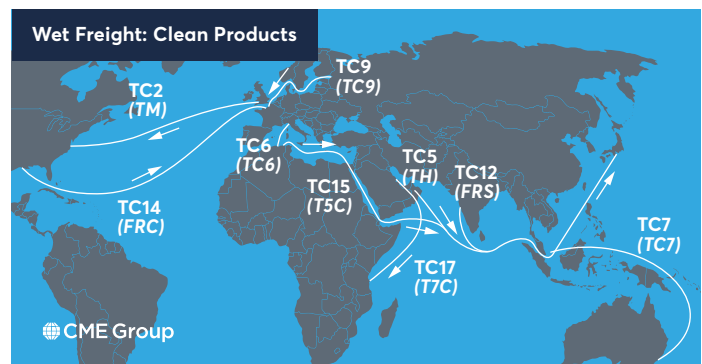

Freight Forward Agreements (FFAs) on NYMEX are a key component to the global seaborne trade in crude oil, refined products, natural gas liquids (NGLs), including liquified petroleum gas (LPG).

Key Benefits

- Competitive fee schedule
- Broad suite of freight routes covering the major routes available for trading
- Straight Through Processing (STP)
- Full regulatory protection and instant confirmation when a trade is cleared
- Freight futures contracts on NYMEX facilitate the secure and efficient clearing of Freight Forward Agreement transactions

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
