

# Metals 2023

Product guide and calendar

As the world's leading and most diverse derivatives marketplace, CME Group ([cmegroup.com](http://cmegroup.com)) is where the world comes to manage risk. CME Group offers the widest range of global benchmark products across all major asset classes, including futures and options based on interest rates, equity indexes, foreign exchange, energy, agricultural commodities, metals, weather, and real estate. CME Group brings buyers and sellers together through its CME Globex electronic trading platform and its trading facility in Chicago. CME Group also operates CME Clearing, one of the world's leading central counterparty clearing providers, which offers clearing and settlement services across asset classes for exchange-traded contracts and over-the-counter derivatives transactions. These products and services ensure that businesses everywhere can substantially mitigate counterparty credit risk.

# Metals at CME Group

---

In today's rapidly moving Metals markets, CME Group helps you forge ahead with certainty by enabling you to:

- Trade the most comprehensive Metals offering that covers all of your needs in one marketplace;
- Tap into unparalleled Precious Metals liquidity and our expanded slate of Base and Ferrous metals solutions, available around the clock;
- Capitalize on innovative product design that makes it easier to execute while reducing your costs to trade.

2022 will be remembered as another year of unprecedented challenges due to a multitude of factors, including market volatility, the reopening of global economies, and geopolitical uncertainty. While precious metals faced conflicting macroeconomic signals and finished the year mostly flat, we continue to see growth elsewhere in our diversified portfolio of offerings. We have made impressive progress in Industrial Metals where we have significant tailwinds in ESG-related products and have seen an influx of participation in our physically delivered, global Aluminum contract.

We have been unwavering in our investment in new products, creating innovative solutions for our customers. A Micro Copper futures contract was launched in May 2022, expanding our growth in micro futures and offering a smaller-sized contract in our Base Metals product slate. Also in the first half of 2022, we listed an Aluminum Option contract to broaden our offerings in our Aluminum sector. In similar fashion, we added an average price option on European Hot-Rolled Coil Steel futures in Q2 2022, providing a new risk management tool in the ferrous metals space. Our fast-growing Friday weekly option contracts were enhanced with the launch of new Monday and Wednesday expiries for Gold, Silver, and Copper. We made multiple product modifications in 2022, including contract month extensions for Cobalt and Lithium futures, amendments to settlement procedures for aluminum and steel products, increases in the block reporting window for Gold, Silver, and Copper futures, and expansion of the chain of custody and acceptable brands for delivery in the Platinum and Palladium futures contracts.

In Precious Metals, Micro Gold and Micro Silver futures recorded their third highest annual volumes in 2022. We also saw the following annual records last year:

- Gold weekly options had its highest volume year all-time with an ADV of 11,327 contracts.
- Silver weekly options had its highest volume year all-time with an ADV of 1,217 contracts.

In Industrial Metals, Micro Copper Futures open interest grew to 2,386 contracts on November 14. COMEX Copper options also finished the year with an ADV of 4,334 contracts, an annual record with an increase of 45% year over year. CME Group also now has a full suite of Aluminum products with a surge of participation in physically deliverable Aluminum futures (ALI) and the launch of Aluminum options (AX). The ADV in ALI grew to 2,395 contracts in Q4 (up 248% YoY) and open interest reached over 1,600 contracts on December 12.

CME Group Steel futures notched its 6th record volume year. Also from CME Group, US Midwest Hot-Rolled Coil Steel futures ADV grew 7% YoY to 1,039 contracts, while overall Steel ADV grew 28% to 1,437 contracts. We continue to see uptake across client segments in our Steel product suite. Open interest in our North European Hot-Rolled Coil Steel contract grew to over 7,000 contracts by the end of the year, up from just over 2,000 at the end of 2021.

Finally, we continue to see positive momentum in our suite of Battery Metals products. Since launching Cobalt futures, the contract has quickly gained traction with over 20,000 MT of Cobalt futures traded at CME Group. We continue to assess the battery metals landscape and evaluate the viability of other battery metals contracts.

We look forward to building on our successes from last year and solidifying our position as the venue of choice for metals derivatives trading, in what may prove to be another year full of challenges and opportunities. On behalf of the CME Group Metals team, we wish you the best for 2023.

## Connect

Connect seamlessly to electronic markets with flexible execution choices that enhance your access to liquidity:

- CME Globex, a global electronic trading system for futures and options.
- CME ClearPort, a comprehensive set of flexible clearing services for the global OTC market.
- CME Direct, a highly-configurable trading front end for CME Group markets that offers a complete suite of solutions across the trading life cycle. Access both QuikStrike, an integrated options analytics tool, and CME Chat, an open instant messaging platform.

## Trade

Benefit from the broadest listed Metals product offering, providing single platform access and potential for margin offset savings.

## Global Repository Services

CME Group Global Repository Services provides multi-asset class reporting solutions to help market participants to comply with their Global Regulatory Reporting requirements. We enable clients to meet their requirements through trade reporting services including the CME Swap Data Repository (CME SDR), CME Canadian Trade Repository (CME CTR), and now CME Australia Trade Repository (CME ATR).

## PRECIOUS METALS FUTURES AND OPTIONS CONTRACTS

---

### GOLD FUTURES

#### Product Code

CME Globex: GC  
 CME ClearPort: GC  
 Clearing: GC  
 TAS: GCT  
 TAM: GCD

#### Contract Size

100 troy ounces

#### Grade and Quality

Gold delivered under this contract shall assay to a minimum of 995 fineness.

#### Settlement

Deliverable

#### Minimum Price Fluctuation

\$0.10 per troy ounce

#### Listed Contracts

Trading is conducted for delivery during the current calendar month; the next two calendar months; any February, April, August, and October falling within a 23-month period; and any June and December falling within a 72-month period beginning with the current month.

#### Termination of Trading

Trading terminates on the third last business day of the delivery month.

#### Trading at Settlement

Trading at Settlement (TAS) is allowed in the nearest five active contract months. The active contract months will be February, April, June, August and December. TAS transactions may be executed at the current day's settlement price or at any valid price increment ten ticks higher or lower than the settlement price.

#### Trade at Marker

Trading at Marker (TAM) is analogous to our existing Trading at Settlement (TAS) wherein parties are permitted to trade at a differential that represents a not-yet-known price. TAM trading will use a marker price, whereas TAS trading uses the Exchange-determined settlement price for the applicable contract month. As with TAS trading, parties enter TAM orders at the TAM price or at a differential between one and ten ticks higher or lower than the TAM price. Trading at Marker is available for the London p.m. Marker on the nearest active month (February, April, June, August, December).

#### Delivery Period

Any business day of the delivery month

---

## GOLD KILO FUTURES

### Product Code

CME Globex: GCK  
CME ClearPort: GCK  
Clearing: GCK

### Contract Size

One kilogram (32.15 troy ounces)

### Grade and Quality

Gold delivered under this contract shall assay to a minimum of 9999 fineness.

### Settlement

Deliverable

### Minimum Price Fluctuation

\$0.10 per troy ounce

### Listed Contracts

The current calendar month, the next two calendar months, and each February, April, June, August, October, and December falling within a 12-month period beginning with the current contract month.

### Termination of Trading

Three business days prior to the Delivery Day

### Delivery Period

Third Wednesday of the delivery month

---

## **GOLD (ENHANCED DELIVERY) FUTURES**

### **Product Code**

CME Globex: 4GC CME

ClearPort: 4GC

Clearing: 4GC

### **Contract Size**

100 troy ounces

### **Grade and Quality**

Gold delivered under this contract shall assay to a minimum of 995 fineness.

### **Settlement**

Deliverable

### **Minimum Price Fluctuation**

\$0.10 per troy ounce

### **Listed Contracts**

Trading is conducted for delivery during the current calendar month; the next two calendar months; any February, April, August, and October falling within a 23-month period; and any June and December falling within a 72-month period beginning with the current month.

### **Termination of Trading**

Trading terminates on the third last business day of the delivery month.

### **Delivery Procedure**

Physical delivery via 100 troy ounce bars, kilo bars or 400 troy ounce bars. 400 troy ounce bars are deliverable via "Accumulated Certificates of Exchange" (ACE) certificates issued by the CME Group Clearing House.

### **Delivery Period**

Any business day of the delivery month

---

## MICRO GOLD FUTURES

## BASE METALS FUTURES AND OPTIONS CONTRACTS

---

### COPPER FUTURES

#### Product Code

CME Globex: HG  
 CME ClearPort: HG  
 Clearing: HG  
 TAS: HGT; HGO  
 TAM: HGF

#### Contract Size

25,000 pounds

#### Grade and Quality

The contract (basis) grade for the Grade 1 copper contract shall be Grade 1 Electrolytic Copper Cathodes (full plate or cut) and shall conform to the specifications (as to chemical and physical requirements) for Grade 1 Electrolytic Copper Cathode as adopted by the American Society for Testing and Materials (B115-00), or its latest revision.

#### Settlement

Deliverable

#### Minimum Price Fluctuation

\$0.0005 per pound

#### Listed Contracts

Trading is conducted for delivery during the current calendar month, the next 23 calendar months, and any March, May, July, September, and December falling within a 63-month period beginning with the current month.

#### Termination of Trading

Trading terminates on the third last business day of the delivery month.

#### Trading at Settlement

Trading at Settlement is available for the nearest four active contract months (HGT). The active contract months are March, May, July, September and December. TAS transactions may be executed at the current day's settlement price or at any valid price increment ten ticks higher or lower than the settlement price. TAS is also available in the spot month (HGO). Spot month TAS transactions are only permitted at the settlement price (flat or zero).

#### Delivery Period

Any business day of the delivery month

#### Trade at Marker

Trading at Marker (TAM) is analogous to our existing Trading at Settlement (TAS) wherein parties are permitted to trade at a differential that represents a not-yet-known price. TAM trading will use a marker price, whereas TAS trading uses the Exchange-determined settlement price for the applicable contract month. As with TAS trading, parties enter TAM orders at the TAM price or at a differential between one and ten ticks higher or lower than the TAM price. Trading at Marker is available for the Copper London Marker on the nearest active month (March, May, July, September, December).

**Termination of Trading**

Trading in the contract shall terminate on the last Thursday of the contract month. If this is not a U.S. business day, trading terminates on the prior U.S. business day.

# Overview of Physical Delivery Process

For most CME Group physically delivered metals contracts, delivery may take place on any business day in the contract month beginning on the first business day of the delivery month, but not later than the last business day of the current delivery month. The Gold Kilo futures has a single delivery day – the third Wednesday of the delivery month. Delivery is the transfer of electronic warrants and funds in Clearing. Deliveries across the delivery month occur with a 3-business day cycle:

**Day 1: Intent and Assignment Day** – Clearing Firms enter sell side intents. CME Clearing assigns sellers to buyers.

**Day 2: Invoicing Day** – Buy and sell side Clearing Firms receive delivery invoices.

**Day 3: Delivery and Payment** – The warrants change ownership from seller to buyer; buyer is debited/seller is credited for the delivery.

Position holders need to be cognizant of applicable position limits for each futures contract in the delivery month.

- 1 • **Establish a position in a futures contract month** (e.g. Jun-19 Gold Futures)
  - Long Position = Take Delivery of a warrant
  - Short Position = Make Delivery of a warrant
- 2 • Short position holders move the product to an Exchange-approved facility.
  - **For Gold Futures, Gold Kilo Futures, Platinum Futures and Palladium Futures, only approved carriers may be used for the transportation of the product.** Exchange rules require transportation to be directly from the refiner facility, or from an approved assayer, or from another Exchange-approved facility.
  - Short position holders register inventory they wish to deliver against their futures positions through their clearing firms (or broker). **Warrants are created by the approved facility during the registration process.**
  - Customers are responsible for transport costs and storage fees for their inventory at an approved facility.
- 3 • As the delivery window commences, **short position holders are required to initiate delivery intentions** through their respective clearing firms. Delivery Intents must be submitted to CME Clearing by the last Intent Day for that delivery month.
  - On Intent Day, all assignments for deliveries are conducted by CME Clearing
  - On Notice Day, **all assignments for deliveries are conducted by CME Clearing.**
  - On Delivery Day, Longs receive warrants and Shorts receive funds.
  - After the delivery process, Longs may choose to remove product from facility (i.e., cancel warrants).

# 3 Business Day Delivery Cycle Example:

## GOLD FUTURES

THU	FRI	SAT	SUN	MON	TUE	WED	THU
<b>Intent/Assignment Day</b> Seller submits delivery intents through their clearing firm. Delivery intents need to be entered in Clearing by short position holders by 7:00 p.m. NY Time on intent day, except that on last intent day, it needs to be sent by 1:00 p.m. CME Clearing runs the delivery assignment.		<b>Invoicing Day</b> Invoices sent to long and short position holders.			<b>Delivery/Payment Day</b> Deliveries will occur during the morning of the collection cycle. The seller receives the funds and the assigned buyer receives warrants.

Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade. All examples in this brochure are hypothetical situations, used for explanation purposes only, and should not be considered investment advice or the results of actual market experience. All matters pertaining to rules and specifications herein are made subject to and are superseded by official CME, CBOT and NYMEX rules. Current rules should be consulted in all cases.
