## Get Connected – Easily

Two options for integrating with CME STP:

### Connect directly

CME Group offers a certification test environment for the CME STP with implementation guides, certification checklist and certification registration forms — ensuring the connection process is simple and efficient.

### Integrate via a third-party vendor

These vendors are certified with CME Group and provide a solution with rapid time to market

Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade.
