

WEATHER PRODUCTS

Weather Futures and Options Codes

Since Weather products were created, we have continually listened to our customers and augmented the product line to meet the expanding needs of the growing weather risk management market. In the tables below, you can find the CME Globex codes for our temperature, frost, snowfall, rainfall and hurricane futures and options contracts.

Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade. All references to options refer to options on futures.
